Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Information Systems Technology Standards Policy Committee (IST/-) to Technical Committee IST/2, upon which the following bodies were represented:

- British Computer Society
- British Federation of Printing Machinery and Supplies Ltd.
- British Telecommunications plc
- Digital Equipment Ltd.
- IBM United Kingdom Ltd.
- Information Systems Committee of the Universities Funding Council
- Institution of Electrical Engineers
- Internation Computers Limited
- Philips Research Laboratories

This British Standard, having been prepared under the direction of the Information Systems Technology Standards Policy Committee, was published under the authority of the Standards Board and comes into effect on 15 May 1993

Text of ISO/IEC 8859-10	1

National foreword

This British Standard reproduces verbatim ISO/IEC 8859-10:1992 and implements it as the UK national standard.

This British Standard is published under the direction of the Information Technology Systems Standards Policy Committee whose Technical Committee IST/2 has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international committee any enquiries on interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

NOTE International and European Standards, as well as overseas standards, are available from BSI Sales Department, BSI, Linford Wood, Milton Keynes, MK14 6LE.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO/IEC title page, pages ii to iv, pages 1 to 12, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

International Standard ISO/IEC 8859-10 was prepared by the European Computer Manufacturers Association (ECMA) (as Standard ECMA-144) and was adopted, under a special “fast-track procedure”, by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, in parallel with its approval by national bodies of ISO and IEC.

ISO/IEC 8859 consists of the following parts, under the general title *Information technology — 8-bit single-byte coded graphic character sets*:

- Part 1: Latin alphabet No. 1;
- Part 2: Latin alphabet No. 2;
- Part 3: Latin alphabet No. 3;
- Part 4: Latin alphabet No. 4;
- Part 5: Latin/Cyrillic alphabet;
- Part 6: Latin/Arabic alphabet;
- Part 7: Latin/Greek alphabet;
- Part 8: Latin/Hebrew alphabet;
- Part 9: Latin alphabet No. 5;
- Part 10: Latin alphabet No. 6.

Annex A and Annex B of this part of ISO/IEC 8859 are for information only.
