

Implementation of
ISO/IEC 9066-1:1989

Information processing systems — Text communication — Reliable Transfer —

Part 1: Model and service definition

Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Information Technology Systems Standards Policy Committee (IST/-) to Technical Committee IST/18, upon which the following bodies were represented:

- British Computer Society
- British Facsimile Industry Consultative Committee
- British Printing Industries Federation
- British Telecommunications plc
- Computing Services Association
- Department of Trade and Industry (Information Technology Division)
- EEA (The Electronics and Business Equipment Association)
- HM Treasury (Central Computer and Telecommunications Agency)
- Her Majesty’s Stationery Office
- Joint Network Team
- Ministry of Defence
- National Computer Users’ Forum
- National Computing Centre Ltd.
- SGML Users’ Group
- Telecommunication Engineering and Manufacturing Association
- University of London
- User Standards Forum for Information Technology (Institute of Data Processing Management)

This British Standard, having been prepared under the direction of the Information Technology Systems Standards Policy Committee, was published under the authority of the Board of BSI and comes into effect on 28 October 1990

Text of ISO/IEC 9066-1	1

National foreword

This British Standard reproduces verbatim ISO/IEC 9066-1:1989 and implements it as the UK national standard.

This British Standard is published under the direction of the Information Technology Systems Standards Policy Committee whose Technical Committee IST/18 has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international committee any enquiries on interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

NOTE International and European Standards, as well as overseas standards, are available from BSI Sales Department, BSI, Linford Wood, Milton Keynes, MK14 6LE.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO/IEC title page, pages ii to iv, pages 1 to 12 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) together form a system for worldwide standardization as a whole. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for approval before their acceptance as International Standards. They are approved in accordance with procedures requiring at least 75 % approval by the national bodies voting. International Standard ISO/IEC 9066-1 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*.
