Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee IST/21, Open systems interconnection, data management and open distributed processing, upon which the following bodies were represented:

- British Computer Society
- British Telecommunications plc
- CCTA (the Government Centre for Information Systems)
- Department of Trade and Industry [IT Standards Unit (ITD6A)]
- Digital Equipment Co Ltd.
- IBM United Kingdom Ltd.
- Joint Information Systems Committee
- International Computers Limited.
- Level 7 Ltd.
- National Computing Centre Ltd.
- National Health Services
- Nine Tiles Computer Systems Ltd.
- PSC International Ltd.
- Rank Xerox (UK) Ltd.
- X Open Company Ltd.
- Coopted Members

This British Standard, having been prepared under the direction of the Information Systems Technology Assembly, was published under the authority of the Standards Board and comes into effect on 15 November 1995

Text of ISO/IEC ISP 11185-17	1

National foreword

This British Standard reproduces verbatim ISO/IEC ISP 11185-17:1995 and implements it as the UK national standard.

This British Standard is published under the direction of the Information Systems Technology Assembly whose Technical Committee IST/21 has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international committee any enquiries on interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

NOTE International and European Standards, as well as overseas standards, are available from Customer Services, BSI, 389 Chiswick High Road, London W4 4AL.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO/IEC ISP title page, pages ii to iv, pages 1 to 13 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC1. In addition to developing International Standards, ISO/IEC JTC1 has created a Special Group on Functional Standardization for the elaboration of International Standardized Profiles.

An International Standardized Profile is an internationally agreed, harmonized document which identifies a standard or group of standards, together with options and parameters, necessary to accomplish a function or set of functions.

Draft International Standardized Profiles are circulated to national bodies for voting. Publication as an International Standardized Profile requires approval by at least 75 % of the national bodies casting a vote.

International Standardized Profile ISO/IEC ISP 11185-17 was prepared with the collaboration of

- OSI Asia-Oceania Workshop (AOW);
- European Workshop for Open Systems (EWOS);
- Open Systems Environment Implementors' Workshop (OIW).

ISO/IEC ISP 11185 consists of the following parts, under the general title *Information technology — International Standardized Profiles FVT2nn — Virtual Terminal Basic Class — Register of control object type definitions*:

- *Part 1: FVT211, FVT212 — Sequenced and Unsequenced Application Control Objects;*
- *Part 2: FVT213, FVT214 — Sequenced and Unsequenced Terminal Control Objects;*
- *Part 3: FVT215, FVT216 — Application RIO Record Loading Control Object, Terminal RIO Record Notification Control Object;*
- *Part 4: FVT217 — Horizontal Tabulation Control Object;*
- *Part 5: FVT218 — Logical Image Control Object;*
- *Part 6: FVT219 — Status Message Control Object;*
- *Part 7: FVT2110 — Entry-Control Control Object;*
- *Part 8: FVT221 — Forms FEICO (Field Entry Instruction Control Object) No. 1;*
- *Part 9: FVT222 — Paged FEICO (Field Entry Instruction Control Object) No. 1;*
- *Part 10: FVT231 — Forms FEPCO (Field Entry Pilot Control Object) No. 1;*
- *Part 11: FVT232 — Paged FEPCO (Field Entry Pilot Control Object) No. 1;*
- *Part 12: FVT2116, FVT2117, FVT2118, FVT2119 — Generalized Telnet Synch, Signal, Negotiation and Subnegotiation Control Objects;*
- *Part 13: FVT2111 — Waiting Time Control Object;*
- *Part 14: FVT2112 — Printer Control Object;*
- *Part 15: FVT2113 — Field Definition Management Control Object;*
- *Part 16: FVT2114 — Terminal Signal Titles Control Object;*
- *Part 17: FVT2115 — Help Text Control Object.*

Annex A forms an integral part of this part of ISO/IEC ISP 11185. Annex B is for information only.
