

Information technology — Telecommunications and information exchange between systems — Local and metropolitan area networks — Technical reports and guidelines —

Part 1: The structure and coding of Logical Link Control addresses in Local Area Networks

ICS 35.110

National foreword

This British Standard reproduces verbatim ISO/IEC TR 11802-1:1997 and implements it as the UK national standard. It supersedes BS ISO/IEC TR 11802-1:1995 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee IST/6, Data communications, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

From 1 January 1997, all IEC publications have the number 60000 added to the old number. For instance, IEC 27-1 has been renumbered as IEC 60027-1. For a period of time during the change over from one numbering system to the other, publications may contain identifiers from both systems.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ISO/IEC TR title page, pages ii to iv, pages 1 to 9 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the DISC Board, was published under the authority of the Standards Board and comes into effect on 15 January 1998

	Page
Foreword	iii
Introduction	1
1 Scope	1
2 References	1
3 Abbreviations	1
4 General considerations	1
4.1 Functions of LLC addresses	1
4.2 Binary and Hexadecimal representation of LLC addresses	2
4.2.1 Binary representation	2
4.2.2 Hexadecimal representation	2
4.2.3 Bit order of transmission	2
4.3 The null address	2
4.3.1 Function of the null address	2
4.3.2 Definition of the null address	2
4.4 The global address	2
4.4.1 Function of the global address	2
4.4.2 Definition of the global address	2
4.5 The address used in conjunction with ISO/IEC TR 9577	2
4.6 The address used in conjunction with SNAP	2
5 Unreserved addresses	3
6 Reserved addresses	3
7 Procedures for assignment of reserved addresses	3
7.1 General considerations	3
7.2 Specific procedures	3
8 LLC address assignments	4
Annex A General format of ISO/IEC 8802-2 addresses	8
Annex B IEEE 802 — Sub-Network Access Protocol (SNAP)	9
Annex C Guidelines for requesting an LLC address value	9
Figure A.1 — Format of the LLC address fields	8
Figure B.1 — Illustration of the IEEE 802 SNAP mechanism	9
