Foreword

This British Standard has been prepared under the authority of the Shipbuilding and Marine Industry Standards Committee, and is based on a proposal of the British Ship Research Association. This standard makes reference to the following British Standards:

- BS 970, *Wrought steels*.
- BS 1387, *Steel tubes and tubulars*.
- BS 1400, *Copper alloy ingots and copper and copper alloy castings*.
- BS 1486, *Lubricating nipples — Part 2: Heavy duty lubricating nipples*.
- BS 4190, *ISO metric black hexagon bolts, screws and nuts*.
- BS 4219, *Slotted grub screws — metric series*.
- BS 4500, *ISO limits and fits*.

The purpose of this standard is to provide details of a deck-end roller fairlead for shipboard use.

The deck-end roller fairlead is designed primarily to be used for guiding the transfer of ropes of up to 80 mm diameter, whilst not under load, over changes in deck levels so as to prevent drag and abrasion effects.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 5 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date	Comments

This British Standard, having been approved by the Shipbuilding and Marine Industry Standards Committee, was published under the authority of the Executive Board on 31 July 1973
