Foreword

This British Standard has been prepared under the direction of the Shipbuilding and Marine Industry Standards Committee and is based on a proposal from the British Steel Corporation, Tubes Division.

This standard provides a specification for ductile iron (spheroidal graphite iron) bulkhead pieces to ensure the integrity of pipework when it passes through compartment division bulkheads or plating on board ship.

This standard is complementary to BS MA 75:1976 “Bulkhead pieces and tank pads”, which has been redesignated by amendment, BS MA 75 “Bulkhead pieces and tank pads” Part 1 “Bulkhead pieces of fabricated steel or copper alloy and steel pad pieces”.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 6 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Amendments issued since publication

Amd. No.	Date of issue	Comments

This British Standard, having been prepared under the direction of the Shipbuilding and Marine Industry Standards Committee was published under the authority of the Executive Board on 29 December 1978
