

Intumescent paint for aerospace purposes — Specification

ICS 49.040; 87.040

Confirmed December 2009

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee, ACE/44, Protective treatments and aircraft finishes, upon which the following bodies were represented:

- British Coatings Federation Ltd.
- Ministry of Defence
- National Centre of Tribology
- Oil and Colour Chemists Association
- Society of British Aerospace Companies

This British Standard, was published under the authority of the Standards Policy and Strategy Committee on 27 May 2004

Foreword

This British Standard has been prepared by Technical Committee ACE/44 and is one of a series for paints and varnishes suitable for aerospace purposes. It covers the specification of an intumescent paint for use on ferrous and non-ferrous metals, selected composites and wood.

It has been assumed in the drafting of this British Standard that execution of its provisions is entrusted to appropriately qualified and experienced people.

WARNING. This British Standard calls for the use of substances and/or procedures that may be injurious to health if adequate precautions are not taken. It refers only to technical suitability and does not absolve the user from legal obligations relating to health and safety at any stage.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises of a front cover, an inside front cover, pages i and ii, pages 1 to 7 and a back cover.
