

Heat curing paint scheme for aerospace purposes — Specification

ICS 49.040; 87.040

Committees responsible for this British Standard

The preparation of this British Standard was entrusted to Technical Committee ACE/65, Non-metallic materials for aerospace purposes (excluding textiles), upon which the following bodies were represented:

- British Hydromechanics Research Group
- British Plastics Federation
- Society of British Aerospace Companies

The following bodies were also represented in the drafting of this standard through subcommittees and panels:

- British Coatings Federation Ltd.
- Ministry of Defence — UK Defence Standardization
- Oil and Colour Chemists Association

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 1 February 2005

Foreword

This British Standard is published by BSI Standards Limited, under licence from The British Standards Institution.

This British Standard has been prepared by Technical Committee ACE/65 and is one of a series for paints and varnishes suitable for aerospace purposes. It covers the specification of heat curing paint for aerospace applications up to 220 °C.

It has been assumed in the drafting of this standard that the execution of its provisions is entrusted to appropriately qualified and experienced people.

The quality assurance authority and approving authority referred to in the standard are as stated in the contract or order, or the accredited representative of the authority stated, as instructed by the purchaser.

WARNING This British Standard calls for the use of substances and/or procedures that may be injurious to health if adequate precautions are not taken. It refers only to technical suitability and does not absolve the user from legal obligations relating to health and safety at any stage.

Text introduced or altered by Amendment No. 1 is indicated in the text by tags **A1** **A1**. Minor editorial corrections are not tagged.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.
