

23RD SESSION OF THE CIE

New Delhi

November 1-8, 1995

Volume 1

COMMISSION INTERNATIONALE DE L'ECLAIRAGE
INTERNATIONAL COMMISSION ON ILLUMINATION
INTERNATIONALE BELEUCHTUNGSKOMMISSION

CONTENTS

	Page
Objectives of the CIE	III
Contents	V
List of CIE Administrative Bodies	1
Divisions and Technical Committees	2
Current CIE Publications	9
Session Programme	13
Papers	
Author	Title
Invited Papers	
Venkatavaradan V S	Light and Civilization 15
Brainard G C	Effects of light on physiology and behavior 16
Slater A I	Lighting and energy in buildings 17
CIE Division 1	
Ikeda M	Division 1 Quadrennial Report 21
Presented Papers	
Wold J H, Valberg A	Cones for colorimetry 24
Takeuchi T	The brightness of objects in non-uniform luminance fields 28
Presented Posters	
Taylor J A F, Knee P C, Verrill J F	Luminance discrimination asymmetries 32
Nakano Y	Statistics of opponent cells and brightness perception 33
Yoon H, Ikeda M	Interaction between two recognized visual space of illumination as a function of illuminance level of the observer's room 37
Halonen L, Eloholma M, Palmi P	The lighting environment for low vision and older people - effects of daylight, luminance level and luminance distribution 39
Kemenade J T C van, Burgt P J M van der	Towards a user oriented description of colour rendition of light sources 43
Poster Display	
Mattiello M L F de, Biondini A R, Pescio S, Buglione S	Visual requirements for the formal recognition of alphanumeric characters 47

Yaguchi H, Miyoshi R, Shioiri S	Individual variations in color matches between color on a self-luminous display and illuminated color chips	49
Yujiri A	Equivalent lightness of colored objects under varied lamp color properties	51
Ayama M, Sakamoto T, Takeda T	Brightness-to-luminance (B/L) ratios in the whole area of the chromaticity diagram	53
Sagawa K	Does visual acuity affect spectral luminous efficiency function determined by brightness matching?	55
Sobagaki H, Nayatani Y	Field trials of the CIE chromatic adaptation transform	57
Nameda N, Matsui H, Yamaguchi Y, Tsutsumi K	Preferred color of an electric power control room for aged operators	59
Ikeda K, Yamashina H	Comparison of predicted colour appearances in NAYATANI, HUNT and NC-IIIC spaces with perceived attributes of object colours evaluated subjectively by psychological experiment	61
Yamashina H, Kuroda A, Hiyama H, Ikeda K	Comparison between colour rendering indices in traditional colour spaces and those in new colour space NC-IIIC	63
Kuroda A, Yamashina H, Yokoo Y, Ikeda K	Psychophysical representation of NCS system	65
Murakami T, Mizoe Y	A detection method of edge for pattern irradiated by spotlighting	67
Ronchi L R	Color appearance in F-M 100-hue test	69
Adrian W	The spectral power distribution of light and its effect on visual functions in low luminance levels	71
Pefferkorn S, Chiron A, Viénot F	Mesopic photometry based on heterochromatic spatial contrast sensitivity measurements	72
Yuanri C, Yang L, Xiangting L, Xinmin W, Jiawang J	Color reproduction for 4-color-printing	74
Chunyang L, Lixiong W, Tianxing S	Quantitative analysis for color environment by microcomputer	76
Pirrotta E, Fairchild M D	Directly testing chromatic adaptation models using object colors	77
CIE Division 2		
Hengstberger F	Division 2 Quadrennial Report	79
Presented Papers		
Sapritsky V I, Khlevnoy B B, Prokhorov A V, Shapoval V I, Stolyarevskaya R I	Candela and lumen realization on the basis of the blackbody achievements	83
Ohno Y	Realization of NIST luminous flux scale using an integrating sphere with an external source	87

Presented Posters

Rossi G, Fusco G, Soardo P	Photometric characterization of materials through gonioreflectometry	91
Verrill J F, Knee P C, O'Halloran J	A study of the uniformity and thermochromism of surface colour standards	95
Rattunde R	The requirements for accurate photometry of lamps and luminaires	97
Coutin-Desbancs J M, Bastie J	Measurement of high density optical filters using a laser diode	98
Campos J, Corrons A, Pons A, Corredera P	Luminous intensity standard based on a cryogenic radiometer	102
Chakraborty S, Mujumdar V R	Photometric aberration	106

Poster Display

Simionescu M, Ionescu F	Real time electrical substitution in laser radiometry : A new approach	109
Denner B F, Leuschner F W, Lotriet C J	Spectrophotometric measurements to investigate the spectral properties of arterosclerotic plaque and of dental enamel	111
Hengstberger F, Denner F, Chang M S, Rastello L M	Realization of the candela with absolute radiometers : Further analysis	113
Ganesha K	A simple calorimeter to measure irradiance to calibrate lux meters	114
Rastello M L, Cirrincione G	A neural detector for photometric measurements	116
Goodman T M et al	Establishment of a new absolute spectral irradiance scale at NPL, using a radiometrically calibrated blackbody	118
Khanh T Q, Swarlik C H, Krochmann E	Industrial spectral radiant flux measurements	119
Czibula G, Grundmann O, Klimroth M, Krochmann E	A new mirror goniophotometer system for optimal room utilization : Approval, calibration and adjustment	121
Kulkarni A D, Rajarshi S V, Kulkarni A A	A new radiant energy flux meter for the infrared range	122
Ram R S, Prakash O	UV radiation measurement from some lamp : Appliances of common use	125
Andasse B, Lièvre M, Bastie J	Thermal transfer detector for low level laser power measurement	128
Rossi G, Iacomussi P, Soardo P	A CCD multidetector for the measurement of the luminous intensity distribution of a luminaire at short distance	130
Rossi G, Fusco G, Soardo P	The calibration of CCD matrix detectors for the measurements on photometric materials and lighting installations	132
Guanrong Y, Diandong Z, Wengan K, Jian L	A sky scanner for the sampling daylight information	134
Zheng L, Zai-ing L, He-jun Y	Thermal analysis of cavity system for cryo-radiometer	135
