## FOREWORD

Standards produced by the Commission Internationale de l'Eclairage (CIE) are a concise documentation of data defining aspects of light and lighting, for which international harmony requires such unique definition. CIE Standards are therefore a primary source of internationally accepted and agreed data, which can be taken, essentially unaltered, into universal standard systems.

This Standard has been prepared by CIE Technical Committee 3-15\*) of Division 3 (Interior Environment and Lighting Design) "Sky luminance models" and was approved by the National Committees of the CIE. This present standard replaces CIE S003 - 1996 "Spatial distribution of daylight - CIE standard overcast sky and clear sky".

## TABLE OF CONTENTS

|                                                           |     |
|-----------------------------------------------------------|-----|
| FOREWORD                                                  | III |
| INTRODUCTION                                              | 1   |
| 1. SCOPE                                                  | 1   |
| 2. NORMATIVE REFERENCES                                   | 1   |
| 3. LIST OF SYMBOLS                                        | 2   |
| 4. SPECIFICATION: THE RELATIVE SKY LUMINANCE DISTRIBUTION | 3   |
| 5. SPECIFICATION: STANDARD PARAMETERS                     | 3   |
| 6. SPECIFICATION: THE TRADITIONAL OVERCAST SKY            | 6   |
| 7. DERIVATION OF THE STANDARD SKY                         | 6   |
