Foreword

International Standards produced by the Commission Internationale de l'Eclairage are concise documents on aspects of light and lighting that require a unique definition. They are a primary source of internationally accepted and agreed data which can be taken, essentially unaltered, into universal standard systems.

This CIE International Standard has been prepared by CIE Technical Committee TC 1-57*. It has been approved by the Board of Administration and Division 1 "Vision and Colour" of the Commission Internationale de l'Eclairage and the CIE National Committees.

The following ISO and IEC committees and working groups co-operated in the preparation of this International Standard:

ISO TC38/SC1/WG7 (Textiles)

ISO TC42 (Photography)
