

COMMISSION INTERNATIONALE DE L'ÉCLAIRAGE
INTERNATIONAL COMMISSION ON ILLUMINATION
INTERNATIONALE BELEUCHTUNGSKOMMISSION

**PROCEEDINGS
of the CIE SEMINAR on
COMPUTER PROGRAMS FOR LIGHT AND
LIGHTING**

**5 - 9 October 1992
CIE Central Bureau
Vienna, Austria**

Pub. No. CIE x005

IV

Contents

Introductory and Invited Papers

Basic concepts of computer aided lighting design - or how accurate are computer predicted photometric values, by <i>A Stockmar</i>	1
File formats for luminaire photometric data, by <i>K Sørensen</i>	4
Luminaire design, by <i>H-J Schmidt</i>	13
From averaged illuminance to 3D-luminance presentation: The wide range of computer aided interior lighting design, by <i>P Dehoff</i>	17
Road lighting computer programs: user friendly and do they give the 'right' answers?, by <i>A Fisher</i>	21

Research Papers

Implementation of the finite element method for non-Lambertian indoor surfaces, by <i>J J Embrechts</i>	35
Automatic design of optimised interior lighting systems, by <i>L Di Fraia</i>	39
A computer graphics tool for the accurate prediction of the color appearance of architectural spaces, by <i>M Smith</i>	42
Automatic design of optimised road lighting systems, by <i>L Di Fraia</i>	46
PC aided administration of a public lighting net, by <i>C Mertens</i>	50
Hypothetical isolux diagram and its 3-D visualization techniques, by <i>M Iizuka and M Kobayashi</i>	54

Description of Computer Programs

ADELIN - Advanced day- and electrical lighting integrated new environment; contact persons: <i>H Erhorn and M Szerman</i>	61
BARCELONA lighting programs; contact persons: <i>R San Martin and R Serra</i>	63
COPHOS family of lighting programs; contact person: <i>P Dehoff</i>	65
DED-1, Software for interior lighting design; contact persons: <i>D Enarun, O Diril and A Batman</i>	72
DELIS-Point, Version 1.0, 1992; contact persons: <i>O Kustch and D Chepelevsky</i>	74
