Contents

	page
Preface	III
Contents	IV
Opening remarks, by <i>J Schanda</i>	1
Overview of 60 years of colorimetry, by <i>A R Robertson</i>	3
Mathematics of CIE colorimetry, by <i>R S Berns</i>	7
Initial remarks to Thornton presentation CIE Vienna 93, by <i>F W Billmeyer, Jr</i>	18
Part 1: An outline of the new colorimetry work and of ISCC Project Committee #49, by <i>W A Thornton</i>	19
Part 2: General comments on the context of a competent colorimetry, by <i>W A Thornton</i>	24
Additivity failures for color matches toward a covering theory and a new standard observer, by <i>M H Brill</i>	32
Maxwell colour matches using two sets of primaries, by <i>Gy Ábrahám, H Körösi, J Schanda, K Wenzel</i>	41
Review of experiments leading to and properties of the 1931 and 1964 Standard Observer, by <i>A R Robertson</i>	46
A few suggestions regarding the CIE publications on colorimetry, by <i>L Morren</i>	50
Towards a fundamental CIE Standard Observer, by <i>P L Walraven</i>	55
Vision research and colorimetry, by <i>J Pokorny and V C Smith</i>	58
Rod activity and color-matching functions, by <i>A G Shapiro, V C Smith and J Pokorny</i>	65
Incorrect predictions of 10 degree trichromatic colour matches on the Stiles trichromator, by <i>P W Trezona</i>	71
Perceptual attributes of colour, by <i>R W G Hunt</i>	75
Chromaticity diagrams, blackness and whiteness, by <i>K Richter</i>	79
Comparison between colour matching functions by the Maxwell method and those by the maximum saturation method obtained by a single observer, by <i>H Yaguchi</i>	85
Maxwell and maximum saturation methods of colour-matching: some sources of error, by <i>P W Trezona</i>	88
Can the tetrachromatic colour matching system solve problems of trichromatic colour matching ?, by <i>P W Trezona</i>	91
General discussion, Part 1: Properties of the CIE colorimetric system and its possible extension	98
General discussion, Part 2: The CIE Standard Colorimetric Observers, validity of Grassmann's laws and the possible contribution of CIE TC 1-36	102
General discussion, Part 3	105
Judd's method for calculating the tristimulus values of the CIE 10° Observer	107
Address list	115
