COMMISSION INTERNATIONALE DE L'ÉCLAIRAGE
INTERNATIONAL COMMISSION ON ILLUMINATION
INTERNATIONALE BELEUCHTUNGSKOMMISSION

PROCEEDINGS of the CIE SYMPOSIUM on ADVANCES IN PHOTOMETRY

**1-3 December 1994
CIE Central Bureau,
Vienna, Austria**

CIE x009 - 1995

Contents

	page
Contents	III
70 years of CIE photometry, Introductory Paper, by <i>K Sagawa</i>	1
The scientific basis of photometry, Key-note Paper, by <i>H W Bodmann</i>	7
Concept and application of the equivalent luminance in photometry, by <i>S Kokoschka</i>	17
Equivalent luminance: Its numerical description and its meaning for the basic visual functions, by <i>W Adrian</i>	31
Multiple approaches in heterochromatic photometry - Consequences for mesopic photometry, by <i>F Viénot, A Chiron and S Pfefferkorn</i>	40
Equivalent luminance from photopic to scotopic levels, by <i>P W Trezona</i>	50
An investigation into the human visual system in the mesopic region using both a classical optical instrument and a VDU, by <i>J A F Taylor, P J Clarke, A R Hanson, P C Knee and J F Verrill</i>	56
On the use of monitors in photometry and vision, by <i>S Diamond</i>	61
General discussion on photometry, equivalent luminance and heterochromatic brightness	67
A chromaticity diagram based on visual response functions, by <i>M Semenov</i>	73
Scientific basis for visual performance, by <i>J Pokorny and V C Smith</i>	80
Visual performance and light spectrum: The inadequacy of conventional photometry, by <i>S Berman</i>	90
Visibility and spectral composition, another look in the mesopic, by <i>T McGowan and M Rea</i>	107
The perception of enhanced blue light sources, by <i>S Fotios and G J Levermore</i>	120
General discussion on photometry, visual acuity, task performance and spectral composition of illumination	127
Visual performance and the directional sensitivity of the retina, by <i>P Walraven</i>	132
Effects of luminance level and spectral composition on visual acuity and performance, by <i>L Halonen and M Elohola</i>	139
The effect of the angular size of the object on the required background luminance, by <i>S Onaygil</i>	147
Sources of visual stress, by <i>A J Wilkins</i>	153
General discussion on photometry at not foveal viewing	162
Practical aspects of lighting quality/Refurbishment and modernisation of lighting installations using energy efficient systems, by <i>F Pop, D Beu, H F Pop and M Moca</i>	165
Implications of rod sensitivity to interior lighting practice, by <i>S Berman</i>	171
Illumination simulator for the design of energetically and physiologically optimum interior lighting, by <i>D Hertel and E Renner</i>	177
The structure of visual images, by <i>L GuoSong</i>	181
