Introduction

The Proceedings of the 23rd Session of the CIE, New Delhi, November 1 - 8, 1995 was published in two volumes, CIE 119 - 1995, containing the papers read at the Session, as well as the Quadrennial Reports of the Division Directors and Introductory Papers for the Round Table Discussions. Volume CIE 120 - 1996 contains reports on General Functions, Divisional Meetings and Workshops, together with the corrected print of four papers where some printing errors occurred in volume 1.

Every effort was taken both on the side of the Organising Committee and the CIE Central Bureau to publish in these two volumes an accurate and up to date overview of CIE activities and contributions of its members. As this is most often the case, a compromise had to be drawn between completeness and timely publication, and thus several post deadline manuscripts had to be left out. These manuscripts had been collected at the CIE Central Bureau and it had been decided to devote a special volume, x011 - 1996, to these late papers and make them available to the CIE community.

Thus in this publication - which is not an official CIE Publication - you will find one late Divisional Report and the text of 12 papers left out from CIE 119 - 1995, partly due to their length and partly due to the fact that they were not available at the time of sending the volume to the printers.

The CIE Central Bureau hopes that with this special volume it not only contributes to the proper archiving of all the activities that took place at the 23rd Session, but also provide to the interested reader a number of interesting papers. These papers were all accepted for presentation at the Session and CIE publication, only due to some administrative problems they did not meet the deadline for inclusion in the official Proceedings.
