Tins CODE OF PRACTICE was prepared under arrangements entered into by the British Standards Institution and the Institution of Civil Engineers, the Institution of Mechanical Engineers and the Institution of Electrical Engineers for the preparation of Codes of Practice outside the orbit of the Council for Codes of Practice for Building (Construction and Engineering Services), established in 1942 under the ægis of the Ministry of Works.

In 1954 agreement was reached between the professional Institutions concerned, the British Standards Institution and the former Council for Codes of Practice for Buildings, that a Council for Codes of Practice should be established within the British Standards Institution to be responsible for the issue of all Codes of Practice in building and in civil, electrical and mechanical engineering. Under the present constitution, a Codes of Practice Committee for Mechanical Engineering was established, and the subject “Installation of Underfeed Stokers” was remitted to this Committee. This Code having been approved by the Solid Fuel Industry Standards Committee and the Codes of Practice Committee for Mechanical Engineering is now published by the British Standards Institution under the authority of the Council for Codes of Practice.

Code committee convened by the institution of mechanical engineers and the British Standards Institution	ii
Introduction	1
Section 1. General	
101 Scope	1
102 Exchange of information	1
Section 2. Design considerations	
201 Boiler room	1
202 Fuel storage	1
203 Flues and chimneys	2
Section 3. Installation	
301 Stokers other than those used for horizontal shell-type boilers with internal circular flues	4
302 Stokers designed for horizontal shell-type boilers with internal circular flues	5
Section 4. Automatic safety controls	
401 Automatic safety controls	6
Section 5. Care and maintenance	
501 Care and maintenance	6

Code committee convened by the institution of mechanical engineers and the British Standards Institution

S. M. Mitchell (*Chairman*)

Nominated by

W. Kitson, M.I.MECH.E., M.I.E.E., M.INST.F., MEM.A.S.M.E.	}	<i>Institution of Mechanical Engineers</i>
A. E. Powell, A.M.I.C.E., M.I.MECH.E.		
E. L. Tinley, M.I.MECH.E., F.INST.F.		

S. W. Barnes, M.INST.F., A.M.INST.B.E.	}	<i>British Standards Institution</i>
W. Charles, M.INST.F., M.I.H.V.E.		
S. M. Mitchell, M.I.MECH.E.		

Co-opted members

G. T. Blackwood, A.M.INST.B.E., A.M.I.W.	}	<i>Association of Shell Boilermakers</i>
F. A. Glidewell, M.INST.F.		

DRAFTING COMMITTEE FOR THE CODE
As above.

This Code of Practice represents a standard of good practice and therefore takes the form of recommendations. Compliance with it does not confer immunity from relevant legal requirements, including bye-laws.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, pages 1 to 7 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.
