

COOLING TECHNOLOGY MANUAL

Chapter 9

MATERIALS OF CONSTRUCTION FOR COOLING TOWERS

May 2017

Chapter 9 (17)

This document was developed using the consensus procedure outlined in the CTI Operating Procedure 304
and has been approved for publication by the CTI Board of Directors

FOREWARD

This Cooling Technology Institute (CTI) publication is published as an aid to cooling tower purchasers and designers. It may be used by anyone desiring to do so, and efforts have been made by CTI to assure the accuracy and reliability of the data contained herein. However, CTI makes no warranty of fitness for particular purpose or merchantability nor any other warranty expressed, implied or statutory. In no event shall CTI be liable or responsible for Incidental, Consequential or Commercial losses or damage of any kind resulting from this publication's use; or violation of any federal, state, or municipal regulation with which this publication may conflict or for the infringement of any patent resulting from the use of this publication.

All CTI codes and standards are copyrighted with all rights reserved to CTI. The reproduction of any part of this or any other CTI code or standard is a violation of Federal Law. One must recognize and appreciate commitment by a number of volunteer members who donate their time to develop and update CTI codes and standards. The monies spent for code development, administrative staff support and publication are essential and constitute a substantial drain on CTI. The purchase price of these documents helps to offset these costs. Reproduction and distribution by others, in addition to being unethical, undermines this system and constitutes a further financial drain on CTI. When copies are needed, you are requested to call or write the Cooling Technology Institute, P.O. Box 681807, Houston, Texas 77268, (281) 583-4087. Please request that your associates buy the required codes and standards rather than copy them. Your cooperation in this matter is greatly appreciated.

Nothing contained herein is to be construed as granting any right for the manufacture, sale or use in connection with any method, apparatus, or product covered by letters patent, nor as insuring anyone against liability for infringement of letters patent.

This guideline document summarizes the best current state of knowledge regarding the specific subject. This document represents a consensus of those individual members who have reviewed this document, its scope and provisions. It is intended to aid all users or potential users of cooling towers.

Approved by the CTI Executive Board.

This document has been reviewed and approved as part of CTI's Five Year Review Cycle. This document is again subject to review in 2022.

Materials of Construction for Cooling Towers

Table of Content

Paragraph	Title	Page
9.1	Scope	5
9.2	Definitions	5
9.3	Structural Materials	5
9.3.1	Lumber	5
9.3.2	Preservative Treatment of Lumber	5
9.3.3	Asbestos Cement Board	5
9.3.4	FRP – Fiber Reinforced Polymer Composites	6
9.3.5	Thermoplastics	6
9.3.6	Hardware and Fasteners	6
9.3.7	Concrete	8
9.4	Mechanical Materials of Construction	8
9.4.1	Cast Iron	8
9.4.2	Ductile Iron	9
9.4.3	Stainless Steel	9
9.4.4	Steel	9
9.4.5	Aluminum	9
9.4.6	Protective Coatings	10
9.4.7	Other Materials	10
9.5	References	11
9.6	Bibliography	11
