Committees responsible for this Draft for Development

The preparation of this Draft for Development was entrusted to Technical Committee PAI/24, Business forms, upon which the following bodies were represented:

- British Printing Industries Federation
- British Telecommunications plc
- Local Authority Organizations
- Loss Prevention Council
- Paper Federation of Great Britain
- Pira International

This Draft for Development, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 February 1997

National foreword

This Draft for Development has been prepared by Technical Committee PAI/24 and is the English language version of ENV 12448:1996 *Paper — Printing and business paper — Determination of the coefficient of static friction*, published as a European Prestandard by the European Committee for Standardization (CEN). ENV 12448:1996 was produced as a result of international discussions in which the United Kingdom took an active part.

This publication is not to be regarded as a British Standard.

It is being issued in the Draft for Development series of publications and is of a provisional nature because it is considered that further experience is required in its application before it is converted into a standard. It should be applied on this provisional basis, so that information and experience of its practical application may be obtained for reporting to the CEN committee responsible for converting the prestandard into a European Standard.

A review of the prestandard will be carried out 2 years after its publication.

Submission of comments from users of this publication is requested. According to the replies received, the responsible BSI Committee will judge whether to support the conversion into a European Standard.

Comments should be sent in writing to the Secretary of BSI Technical Committee, PAI/24 at BSI, 389 Chiswick High Road, London W4 4AL, quoting the document reference (DD ENV 12448:1997), the relevant clause number and proposing, where possible, an appropriate revision of the text.

NOTE International and European Standards, as well as overseas standards, are available from Customer Services, BSI, 389 Chiswick High Road, London W4 4AL.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ENV title page, pages 2 to 8, an inside back cover and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

Paper — Printing and business paper — Determination of the coefficient of static friction

Papier — Papier d'impression et de bureau —
Détermination du coefficient de frottement
statique

Papier — Druck — und Büropapiere —
Bestimmung des statischen
Reibungskoeffizienten

This European Prestandard (ENV) was approved by CEN on 1996-10-05 as a prospective standard for provisional application. The period of validity of this ENV is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the ENV can be converted into an European Standard (EN).

CEN members are required to announce the existence of this ENV in the same way as for an EN and to make the ENV available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the ENV) until the final decision about the possible conversion of the ENV into an EN is reached.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
