Committees responsible for this Draft for Development

The preparation of this Draft for Development was entrusted to Technical Committee TCI/35, Geotextiles, upon which the following bodies were represented:

- Association of Consulting Engineers
- British Geotechnical Society
- British Polyolefin Textiles Association
- British Textile Technology Group
- Chemical Industries Association
- Department of the Environment (Building Research Establishment)
- Department of Transport (Transport Research Laboratory)
- Department of Transport (Highways Agency)
- ERA Technology Ltd.
- Federation of Civil Engineering Contractors
- Institute of Asphalt Technology
- Institute of Wastes Management
- Institution of Chemical Engineers
- Institution of Civil Engineers
- National Rivers Authority
- Society of Engineers' Incorporated

This Draft for Development, having been prepared under the direction of the Sector Board for Materials and Chemicals, was published under the authority of the Standards Board and comes into effect on 15 October 1996

National foreword

This Draft for Development has been prepared by Technical Committee TCI/35 and is the English language version of ENV 1897:1996 *Geotextiles and geotextiles related products — Determination of the compressive creep properties*, published by the European Committee for Standardization (CEN). ENV 1897 was produced as a result of international discussion in which the United Kingdom participated.

Cross-references

Publication referred to	Corresponding British Standard
EN 963	BS EN 963:1995 <i>Geotextiles and geotextile-related products — Sampling and preparation of test pieces</i>
EN 964-1	BS EN 964 <i>Geotextiles and geotextile-related products — Determination of thickness at specified pressures</i> Part 1:1995 <i>Single layers</i>

This publication is not to be regarded as a British Standard

It is being issued in the Draft for Development series of publications and is of a provisional nature because there is at present insufficient experience in the use of the test method. It should be applied on this provisional basis, so that information and experience of its practical application may be obtained and reported to the responsible CEN Technical Committee. Users of this Draft for Development are invited to comment on its technical content, ease of use and any ambiguities or anomalies. These comments will be taken into account when preparing the UK national response to CEN on the question of whether the ENV can be converted to an EN. Comments should be sent in writing to the Secretary of BSI Technical Committee B/515 at BSI, 389 Chiswick High Road, London, W4 4AL, quoting this Draft for Development, the relevant clause number and a proposed revision, within 2 years of the issue of this Draft for Development.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN title page, pages 2 to 12 and a back cover.
This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

ICS 59.080.70

Descriptors: Filter fabrics, compression tests, determination, creep properties, measurements, thickness

English version

Geotextiles and geotextiles related products — Determination of the compressive creep properties

Géotextiles et produits apparentés —
Détermination des propriétés de fluage en
compression

Geotextilien und geotextilverwandte
Produkte — Bestimmung des Kriechverhaltens
bei Druckbeanspruchung

This European Prestandard (ENV) was approved by CEN on 1995-09-28 as a prospective standard for provisional application. The period of validity of this ENV is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the ENV can be converted into an European Standard (EN).

CEN members are required to announce the existence of this ENV in the same way as for an EN and to make the ENV available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the ENV) until the final decision about the possible conversion of the ENV into an EN is reached.

CEN members are the national standards bodies of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Prestandard has been prepared by Technical Committee CEN/TC 189, Geotextiles and geotextile-related products, the secretariat of which is held by IBN.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to announce this European Prestandard: Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.
