National foreword

This Draft for Development is the English language version of ENV 343:1998.
This publication is not to be regarded as a British Standard.

It is being issued in the Draft for Development series of publications and is of a provisional nature. It should be applied on this provisional basis, so that information and experience of its practical application may be obtained.

Comments arising from the use of this Draft for Development are requested so that UK experience can be reported to the European organization responsible for its conversion into a European Standard. A review of this publication will be initiated 2 years after its publication by the European organization so that a decision can be taken on its status at the end of this three-year life. The commencement of the review period will be notified by an announcement in *Update Standards*.

According to the replies received by the end of the review period, the responsible BSI Committee will decide whether to support the conversion into a European Standard, to extend the life of the prestandard or to withdraw it. Comments should be sent in writing to the Secretary of BSI Technical Committee PH/3, Protective clothing, at 389 Chiswick High Road, London W4 4AL, giving the document reference and clause number and proposing, where possible, an appropriate revision of the text.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the ENV title page, pages 2 to 16 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This Draft for Development, having been prepared under the direction of the Health and Environment Sector Board, was published under the authority of the Standards Board and comes into effect on 15 April 1998

ICS 13.340.10

Descriptors: Personal protective equipment, protective clothing, weather resistance, winds, specifications, thermal insulation, water vapor tests, water tightness, marking

English version

Protective clothing — Protection against foul weather

Vêtements de protection — Protection contre les
intempéries

Schutzkleidung — Schutz gegen schlechtes
Wetter

This European Prestandard (ENV) was approved by CEN on 22 January 1998 as a prospective standard for provisional application.

The period of validity of this ENV is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the ENV can be converted into a European Standard.

CEN members are required to announce the existence of this ENV in the same way as for an EN and to make the ENV available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the ENV) until the final decision about the possible conversion of the ENV into an EN is reached.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Prestandard has been prepared by Technical Committee CEN/TC 162 “*Protective clothing including hand and arm protection and lifejackets*” the secretariat of which is held by DIN.

This European Prestandard has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For relationship with EU Directive(s), see informative Annex ZA, which is an integral part of this standard.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to announce this European Prestandard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

Foreword	2	
Introduction	5	
1 Scope	5	
2 Normative references	5	
3 Definitions	6	
3.1 Foul weather	6	
3.2 Water vapour resistance	6	
3.3 Thermal resistance (insulation)	6	
3.4 Water penetration resistance w_p [Pa]	6	
3.5 Outer shell material	6	
3.6 Liner	6	
3.7 Thermal liner	6	
3.8 Thermal lining	6	
3.9 Lining	6	
4 Performance requirements	7	
4.1 Resistance to water penetration	7	
4.2 Water vapour resistance	7	
4.3 Thermal resistance of the separable thermal lining	8	
4.4 Tensile strength of the outer shell material	8	
4.5 Tear resistance of the outer shell material	8	
4.6 Dimensional change of the protective clothing	8	
4.7 Seam strength of the outer shell material	8	
4.8 Style of the protective clothing	8	
5 Testing requirements	9	
5.1 Testing of resistance to water penetration	9	
5.2 Testing of water vapour resistance, R_{et}	10	
5.3 Testing of thermal resistance, R_{ct}	10	
5.4 Testing of tensile strength	10	
5.5 Testing of tear resistance	10	
5.6 Testing of dimensional change	10	
5.7 Testing of seam strength	10	
6 Marking and care labelling	11	
7 Sizes	11	
8 Information supplied by the manufacturer	11	
		Annex A (informative) Recommendations for wearing time 12
		Annex B (informative) Test device for one-sided exposure to fuel and oil 12
		Annex C (normative) Glass paper or glass cloth 13
		Annex D (informative) Examples of textile laminates or thermal liners 13
		Annex ZA (informative) Clauses of this European Prestandard addressing essential requirements or other provisions of EU Directives 16
		Figure B.1 — Example for a test device for one-sided exposure 12
		Figure D.1 — 3-layer laminate as outer shell 13
		Figure D.2 — 2-layer laminate plus lining 14
		Figure D.3 — Combination of lining, liner and outer material 14
		Figure D.4 — Combination of lining, thermal liner and outer material 15
		Table 1 — Application of performance tests on the components 7
		Table 2 — Classification of resistance to water penetration 7
		Table 3 — Classification of water vapour resistance 8
		Table 4 — Classification of water vapour resistance of the separable thermal lining 8
		Table 5 — Classification of thermal resistance of the separable thermal lining 8
		Table A.1 — Recommended maximum continuous wearing time for a complete suit consisting of jacket and trousers without thermal lining 12
		Table C.1 — Mass of glass paper or cloth 13
		Table C.2 — Abrasive grain 13
		Table C.3 — Breaking strength 13
		Table ZA.1 16
