Foreword

This DIN SPEC is part of a DIN pilot project for the cooperation with open source communities.

The content of this document (both parts of DIN SPEC 3105) is published under Creative Commons Attribution-ShareAlike 4.0 License (international) (CC-BY-SA 4.0, <https://creativecommons.org/licenses/by-sa/4.0/legalcode>) by DIN e.V. For attribution, the authors (DIN SPEC 3105 Workshop, named in the foreword) may be represented by "DIN e.V.".

The pilot project elaborates the possibilities to publish DIN SPECs under a free/open license, which could enable the cooperation with open source communities. Since the publication under CC-BY-SA 4.0 allows everyone to use, share and adapt the content of this document under the same or compatible licenses, the maintenance procedure of such a DIN SPEC needs to be elaborated during the pilot project.

This document is the first edition released by DIN and has the version number 0.10 given by the open source hardware community. The document will be shared on <https://din.one> and <https://gitlab.com/OSGermany/OHS/> for further revision based on external contributions. This DIN SPEC has been developed according to the PAS procedure. The development of a DIN SPEC according to the PAS procedure is carried out in DIN SPEC (PAS)-consortiums and does not require the participation of all stakeholders.

This document has been developed and adopted by the initiator(s) and authors named below:

— Felix Arndt

Open Source Imaging and Fair GmbH

— Dr. Jérémy Bonvoisin

University of Bath

— Tobias Burkert, Lukas Schattenhofer

TU Berlin, Student

— Jerry de Vos

Precious Plastic

— Fabian Flüchter

IP Center Bucerius Law School

— Martin Häuer, Dietrich Jäger, Timm Wille

Open Source Ecology Germany e.V.

— Mehera Hassan, Robert Mies

TU Berlin, Institute for Machine Tools and Factory Management, Chair of Quality Science

— Brynmor John

Field Ready

— Manuel Moritz, Dr. Tobias Redlich

Helmut Schmidt University

— Christian Schmidt-Gütter

Cradle to Cradle e.V.

— Emilio Velis

Appropedia Foundation

— Joost van Well

Cleopa GmbH

— Diderik van Wingerden

think.innovation

— Tobias Wenzel

Journal of Open Hardware

— Dr. Lukas Winter

Physikalisch Technische Bundesanstalt

— Lars Zimmermann

Mifactori – Open Circularity

At present, there are no standards covering this topic.

DIN SPEC (PAS)s are not part of the body of German Standards.

A draft of this DIN SPEC (PAS) has not been published.

Despite great efforts to ensure the accuracy, reliability and precision of technical and non-technical information, the DIN SPEC (PAS)-consortium cannot give any explicit or implicit assurance or warranty in respect of the accuracy of the document. Users of this document are hereby made aware that the consortium cannot be held liable for any damage or loss. The application of this DIN SPEC (PAS) does not release users from the responsibility for their own actions and is applied at their own risk.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. DIN shall not be held responsible for identifying any or all such patent rights.

Provision of this document free of charge as a PDF via the Beuth WebShop has been financed in advance.

For current information on this standard, please go to DIN's website (www.din.de) and search for the document number in question.
