APPROVED: September 18, 1989

EIA-498BA00

EIA SPECIFICATION

Blank Detail Specifcation for Keyboard Switches

EIA-498BA00

JANUARY 1990

ELECTRONIC INDUSTRIES ASSOCIATION
ENGINEERING DEPARTMENT

Approved For Use In
The NECQ System

NOTICE

EIA Engineering Standards and Publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards and Publications shall not in any respect preclude any member or nonmember of EIA from manufacturing or selling products not conforming to such Standards and Publications, nor shall the existence of such Standards and Publications preclude their voluntary use by those other than EIA members, whether the standard is to be used either domestically or internationally.

Recommended Standards and Publications are adopted by EIA without regard to whether or not their adoption may involve patents on articles, materials, or processes. By such action, EIA does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Recommended Standard or Publication.

This EIA Specification is considered to have International Standardization implication, but the International Electrotechnical Commission activity has not progressed to the point where a valid comparison between the EIA Specification and the IEC document can be made.

This Specification does not purport to address all safety problems associated with its use or all applicable regulatory requirements. It is the responsibility of the user of this Specification to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before its use.

(From EIA Standards Proposal No. 2153 formulated under the cognizance of the EIA P-13.3 Subcommittee on Non-Sensitive Pushbutton and Keyboard Switches.)

APPROVED FOR USE IN THE NECQ SYSTEM AS NQ/EIA-498BA00.
