

ANSI /EIA 463-B-2003
Approved: January 17, 2003

EIA-463-B

EIA STANDARD

Fixed Aluminum Electrolytic Capacitors for Alternating Current Motor Starting Heavy Duty (Type 1) and for Standard Duty (Type 2)

EIA-463-B

(Revision of EIA-463-A)

February 2003

Electronic Components, Assemblies & Materials Association

CONTENTS

	Page
Foreword	iii
1 Scope	1
2 Definitions	1
3 Standard ratings, dimensions and tolerances	1
4 Applicable documents	9
5 Standard test conditions	9
6 Quality assurance	10
7 Visual and mechanical examination	10
8 Marking	10
9 Capacitance and power factor.....	11
10 Solderability.....	11
11 Terminal strength.....	11
12 Vibration.....	11
13 Case insulation.....	12
14 Overvoltage	12
15 Vent	12
16 Accelerated life test	12
17 Application notes	12
Annexes	
A Detail specification 1—Plastic case alternating current; aluminum electrolytic capacitors for heavy duty motor starting applications.....	15
B Detail specification 2—Plastic case alternating current; aluminum electrolytic capacitors for standard duty motor starting applications	17
C Publication sources	19
Figures	
1 Terminal details	3
2 Top orientation	4
3 Case dimensions and details	5
4 Standard end cap dimensions	6
5 Standard terminal and resistor layouts	7
6 Standard capacitor bracket dimensions	8
7 Capacitance/power factor test circuit	11
Tables	
1 Aluminum can capacitor dimensions	9
2 Quality assurance test program	10
A.1 Duty cycle and duration of accelerated life test.....	15
B.1 Recommended case sizes for standard capacitance, voltage ratings	17
B.2 Duty cycles and duration of tests for standard duty applications	18

.....

Forward

EIA-463-B has been revised under the cognizance of the P-2.2 Committee on Paper, Film and Mica Capacitors of the Electronic Industries Alliance's sector Electronic Components, Assemblies, Equipment & Supplies Association (EIA/ECA).

ELECTRONIC COMPONENTS, ASSEMBLIES & MATERIALS
ASSOCIATION

THE ELECTRONIC COMPONENTS SECTOR OF THE ELECTRONIC INDUSTRIES ALLIANCE

NOTICE

EIA Engineering Standards and Publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards and Publications shall not in any respect preclude any member or nonmember of EIA from manufacturing or selling products not conforming to such Standards and Publications, nor shall the existence of such Standards and Publications preclude their voluntary use by those other than EIA members, whether the standard is to be used either domestically or internationally.

Standards and Publications are adopted by EIA in accordance with the American National Standards Institute (ANSI) patent policy. By such action, EIA does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard or Publication.

This EIA Standard is considered to have International Standardization implication, but the International Electrotechnical Commission activity has not progressed to the point where a valid comparison between the EIA Standard and the IEC document can be made.

This Standard does not purport to address all safety problems associated with its use or all applicable regulatory requirements. It is the responsibility of the user of this Standard to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before its use.

(From Standards Proposal No. 5004, formulated under the cognizance of the ECA P-2.2 Committee on Paper, Film and Mica Capacitors.
