NOTICE

EIA Engineering Standards and Publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchasers in selecting and obtaining with minimum delay the proper product for their particular needs. Existence of such Standards and Publications shall not in any respect preclude any member or nonmember of EIA from manufacturing or selling products not conforming to such Standards and Publications, nor shall the existence of such Standards and Publications preclude their voluntary use by those other than EIA members, whether the standard is to be used either domestically or internationally.

Standards and Publications are adopted by EIA in accordance with the American National Standards Institute (ANSI) patent policy. By such action, EIA does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard or Publication.

Technical Publications are distinguished from EIA Standards or Interim Standards, in that they contain a compilation of engineering data or information useful to the technical community and represent approaches to good engineering practices that are suggested by the formulating committee.

This publication is not intended to preclude or discourage other approaches that similarly represent good engineering practice, or that may be acceptable to, or have been accepted by, appropriate bodies. Parties who wish to bring other approaches to the attention of the formulating committee to be considered for inclusion in future revisions of this publication are encouraged to do so. It is the intention of the formulating committee to revise and update this publication from time to time as may be occasioned by changes in technology, industry practice, or government regulations, or for other appropriate reasons.

(From Project No. 3824, formulated under the cognizance of the EIA Automated Component Handling (ACH) Committee.)

FORM 1
Procedure for Registration of New Technologies
for Automated Component Handling

1 Scope

This document defines the means for review and registration of new technologies pertaining to automated handling of electronic components.

2 Applicable EIA documents

EP-7-B "Style Manual for Standards and Publications of EIA, TIA, and JEDEC"

3 Procedure

3.1 Contact EIA requesting an opportunity to make a presentation of the new technology for automated component handling.

3.2 EIA sends necessary registration forms, procedures, and guidelines.

3.3 Requestor prepares documentation according to the prescribed procedure and submits the completed package to EIA. (Read and complete all forms provided herein.)

3.4 The Chairman of the Automated Component Handling Committee reviews the documentation and does the following:

(1) Accepts the document, placing it on the Automated Component Handling Committee (ACH) agenda for future presentation to the committee (see Form No. 3); or,

(2) Returns the document to the submitting party for revision (see Form No. 2); or

(3) Rejects document as outside the scope of ACH. (see Form No. 2, section 3). Documents may not be rejected for this reason or any other reason without prior review and approval by the EIA General Counsel.

3.5 An accepted document will be circulated to the ACH Committee membership and a presentation is made to the members in attendance (see Form No. 3).
