

EIA-815

EIA STANDARD

Miniature Aluminum Electrolytic Capacitor (Leaded) Qualification Specification

EIA-815

AUGUST 1999

ELECTRONIC INDUSTRIES ALLIANCE

**ELECTRONIC COMPONENTS, ASSEMBLIES, EQUIPMENT & SUPPLIES
ASSOCIATION**

NOTICE

EIA Engineering Standards and Publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for his particular need. Existence of such Standards and Publications shall not in any respect preclude any member or nonmember of EIA from manufacturing or selling products not conforming to such Standards and Publications, nor shall the existence of such Standards and Publications preclude their voluntary use by those other than EIA members, whether the standard is to be used either domestically or internationally.

Standards and Publications are adopted by EIA in accordance with the American National Standards Institute (ANSI) patent policy. By such action, EIA does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the Standard or Publication.

This EIA Standard is considered to have International Standardization implication, but the International Electrotechnical Commission activity has not progressed to the point where a valid comparison between the EIA Standard and the IEC document can be made.

This Standard does not purport to address all safety problems associated with its use or all applicable regulatory requirements. It is the responsibility of the user of this Standard to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before its use.

(From Project Number 3728, formulated under the cognizance of the P-2.4 Aluminum Electrolytic Capacitors Subcommittee.)

Foreword

This specification was prepared by the P-2.4 Subcommittee on Aluminum Electrolytic Capacitors of the Electronic Industries Alliance's sector Electronic Components, Assemblies, Equipment & Supplies Association (EIA/ECA).
