ENGINEERING EQUIPMENT AND MATERIALS USERS' ASSOCIATION

The Engineering Equipment and Materials Users' Association, more commonly known as EEMUA, is a European non-profit membership Association helping companies that own or operate industrial facilities - the *users* of engineering equipment and materials.

EEMUA aims to improve the safety, environmental and operating performance of industrial facilities in the most cost-effective way, thereby demonstrating and pursuing leadership in asset management.

EEMUA Members pursue these aims through collaboration for mutual benefit, sharing engineering experiences and expertise and by promoting their distinct interests as the users of engineering products.

Specifically, the aims of EEMUA Member companies are achieved by:

- providing the organisation within which networking, information sharing and collaboration on non-competitive technical matters can take place;
- influencing the way written regulations are interpreted and applied in practice;
- presenting and promoting Members' views, and encouraging the application of good, sound engineering practices;
- developing user guides, specifications, training and competency schemes;
- facilitating Members' participation in national and international standards making;
- influencing relevant national and European legislation and regulations.

Formed in 1949 as the Engineering Equipment Users Association, and re-named in 1983 (as a result of taking over the materials association, OCMA), EEMUA has for more than fifty years given companies that own and operate process plants, power stations and other significant industrial facilities, a collaborative voice in addressing technical and engineering related issues that impact on good integrity management and asset management practices. The Association is open to companies of all sizes that meet its 'engineering user' criteria. Further details of current Members of EEMUA is available on the Association's website, www.eemua.org.

EEMUA activities often lead to the production of publications. These are prepared for Members' use and are often offered for sale as well.

A list of EEMUA publications for sale is given at the end of this Publication. The full list is also on the Association's website, including details of on-line shopping facilities.

To enquire about corporate Membership, write to enquiries@eemua.org or call +44 (0)20 7621 0011.

ABOUT THIS PUBLICATION

Legal Aspects

All rights, title and interest in this Publication shall belong to EEMUA. All rights are reserved. No part of this Publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means: electronic, mechanical, photocopying, recording or other, without the express prior written agreement of the EEMUA Executive Director.

Infringement of copyright is illegal and also reduces the Association's income thereby jeopardising its ability to fund the production of future publications.

It has been assumed in the preparation of this Publication that: the user will ensure selection of those parts of its contents appropriate to the intended application; and that such selection and application will be correctly carried out by appropriately qualified and competent persons for whose guidance this Publication has been prepared. EEMUA and the individual members of the Work Group that prepared this EEMUA Publication do not, and indeed cannot, make any representation or give any warranty or guarantee in connection with material contained herein. EEMUA and the individual members of the Work Group that prepared this EEMUA Publication expressly disclaim any liability or responsibility for damage or loss resulting from the use or reliance on this Publication. Any recommendations contained herein are based on the most authoritative information available at the time of writing and on current good engineering practice, but it is essential for the user to take account of pertinent subsequent developments and/or legislation.

Any person who encounters an inaccuracy or ambiguity when making use of this Publication is asked to notify EEMUA without delay so that the matter may be investigated and appropriate action taken.

Consultation and Feedback

EEMUA encourages constructive comments on this Publication from both Members of the Association and others.

Comments should be sent on the standard feedback form, a copy of which is provided towards the end of this Publication. An electronic version of the feedback form is available from EEMUA - e-mail your request for a copy to enquiries@eemua.org, telephone your request to +44 (0)20 7621 0011, or download the form from the EEMUA website at www.eemua.org. Submit comments by e-mail (preferred) or post.

Comments will be considered by the relevant EEMUA Technical Committee and may be incorporated in future editions of this Publication. New editions will be publicised on the EEMUA website.

Contents

1. Introduction and Scope	1
2. Qualification	3
2.1 Introduction	3
2.2 Objectives of the Qualification Roadmap	3
3. Materials	7
3.1 Introduction	7
3.2 Concrete	7
3.3 Shotcrete	10
3.4 Cementitious Materials	11
3.5 Aggregates	11
3.6 Water	11
3.7 Admixtures	11
3.8 Fibres	11
3.9 Reinforcement	11
3.10 Post-tensioning Ducts	13
3.11 Grout	13
3.12 Insulation	13
3.13 Metallic Components	14
3.14 Structural Non-metallic Components	14
3.15 Coatings	14
4. Design	17
4.1 Introduction	17
4.2 General Design Requirements	17
4.3 Design Actions	19
4.4 Foundations	26
4.5 Primary Pre-stressed Concrete Tanks	27
4.6 Secondary Concrete Tank	35
4.7 Insulation Systems	40
4.8 Membranes and Linings	41
4.9 Instrumentation Systems	42
4.10 Electrical Systems	42
4.11 Pressure and Vacuum Relief Systems	44
4.12 Piping Systems	44
4.13 Roof Platforms	45
5. Construction	47
5.1 Introduction	47
5.2 Documentation	47
5.3 Work Organisation	48
5.4 Testing and Quality Control during Construction	49
5.5 Concrete Construction	52
5.6 Steel Structure	54
5.7 Installation of Insulation	55
5.8 Mechanical Outfitting	55
6. Inspection and Testing of the Completed Works	57
6.1 Introduction	57
6.2 Objectives	57

6.3 Organisation	58
6.4 Double Concrete Tank without Liner to Primary Tank	58
6.5 Double Concrete Tank with Steel Lined Primary Tank	64
7. Tank Commissioning	69
7.1 Introduction	69
7.2 Status of Tank at Start of Commissioning	69
7.3 Preparation for Commissioning	70
7.4 Drying of Tank	71
7.5 Purging	72
7.6 Commissioning of the Tank Heating System.....	74
7.7 Cool-down	74
7.8 Commissioning of the Submerged Pumps	76
7.9 Completion of Commissioning	76
8. Operations	77
8.1 Introduction	77
8.2 Prevention of an Overfill	77
8.3 Prevention of Overpressure	77
8.4 Prevention of Vacuum.....	77
8.5 Tank Heating System	78
8.6 Liquid in Annulus	78
8.7 Prevention of Rollover	78
8.8 Refilling after Maintenance	78
9. Maintenance	79
9.1 Introduction	79
9.2 Safety	79
9.3 Maintenance Planning	79
9.4 Review of Tank Performance.....	79
9.5 Foundations	79
9.6 Wall	81
9.7 Concrete Roof	81
9.8 Equipment Items	82
9.9 Inspection Check List and Suggested Inspection Frequency.....	83
10. Tank Decommissioning.....	85
10.1 Introduction	85
10.2 Decommissioning Procedure	88
11. Demolition.....	95
11.1 Introduction	95
11.2 Responsibilities of the Owner and Contractor.....	95
11.3 Documentation and Planning	96
11.4 Methods of Demolition	97
11.5 Demolition Procedures and Methods.....	97
12. Definitions and Abbreviations	101
13. References	103
13.1 Standards, Codes and Directives	103
13.2 EEMUA Publications	107
13.3 References in this Publication.....	107
14. Bibliography	111
