

ESDU 67020

Issued March 1967
With Amendment A
March 1969

Fatigue strength of steel screw threads with large root radii under axial loading

Endorsed by
The Royal Aeronautical Society
The Institution of Mechanical Engineers

ESDU DATA ITEMS

Data Items provide validated information in engineering design and analysis for use by, or under the supervision of, professionally qualified engineers. The data are founded on an evaluation of all the relevant information, both published and unpublished, and are invariably supported by original work of ESDU staff engineers or consultants. The whole process is subject to independent review for which crucial support is provided by industrial companies, government research laboratories, universities and others from around the world through the participation of some of their leading experts on ESDU Technical Committees. This process ensures that the results of much valuable work (theoretical, experimental and operational), which may not be widely available or in a readily usable form, can be communicated concisely and accurately to the engineering community.

We are constantly striving to develop new work and review data already issued. Any comments arising out of your use of our data, or any suggestions for new topics or information that might lead to improvements, will help us to provide a better service.

THE PREPARATION OF THIS DATA ITEM

The work on this particular Data Item was monitored and guided by the Fatigue Committee which first met in 1955 and now has the following membership:

Chairman	
Mr R.H. Sandifer	— Handley Page Ltd
Vice-Chairman	
Dr G. Forrest	— Aluminium Laboratories Ltd
Members	
Mr K.E. Cheverton	— Bristol Siddeley Engines Ltd
Mr R.A. Clare	— Ministry of Technology
Mr H.L. Cox	— National Physical Laboratory
Mr A.J. Fenner	— National Engineering Laboratory
Dr W.J. Harris	— Bristol Siddeley Engines Ltd
Mr H.B. Howard	— Independent
Mr N.H. Mason	— Ministry of Technology
Mr E.L. Ripley	— Royal Aircraft Establishment
Mr V.A.B. Rogers	— Westland Aircraft Ltd
Mr M.A. Taunton	— British Aircraft Corporation (Filton) Ltd.

The Item was also accepted for inclusion in the Stress and Strength Series by the Stress Analysis and Strength of Components Committee, which first met in 1964 and now has the following membership:

Chairman	
Mr H.L. Cox	— National Physical Laboratory
Vice-Chairman	
Mr G.P. Smedley	— Lloyd's Register of Shipping
Members	
Prof. J.M. Alexander	— Imperial College of Science and Technology
Mr A.J. Batchelor	— Imperial Chemical Industries Ltd
Mr C.E. Day	— National Coal Board
Mr J.R. Dixon	— National Engineering Laboratory
Dr H. Fessler	— University of Nottingham
Mr N.E. Frost	— National Engineering Laboratory
Dr R.B. Heywood	— A. Macklow-Smith Ltd
Mr M.J. Kemper	— A.P.V. Company Ltd
Mr J. Spence	— University of Strathclyde
Mr J.V. Vint	— Davy and United Engineering Company Ltd.
