FOREWORD

1. This document was prepared by EUROCAE Working Group 67 and was approved by the Council of EUROCAE on 07 May 2020.
2. EUROCAE is an international non-profit making organisation in Europe. Membership is open to manufacturers and users of equipment for aeronautics, trade associations, national civil aviation administrations, and, under certain conditions, non-European organisations. Its work programme is principally directed to the preparation of performance specifications and guidance documents for civil aviation equipment, for adoption and use at European and world-wide levels.
3. The findings of EUROCAE are resolved after discussion amongst Members of EUROCAE through their appropriate committees.
4. This document complements ED-137/4C INTEROPERABILITY STANDARDS FOR VOIP ATM COMPONENTS VOLUME 4: RECORDING (March 2019).

   The document has been updated to address issues on published version, most of them discovered at the FAA VoIP Interoperability event, which took place in Atlantic City, New Jersey, from April 29th through May 10th, 2019.

   As compared with the previous version, the main changes can be found in the Change Summary chapter.
5. EUROCAE performance specifications and other documents are recommendations only. EUROCAE is not an official body of the European Governments. Its recommendations are valid as statements of official policy only when adopted by a particular government or conference of governments.
6. Copies of this document may be obtained from:

CHAPTER 1

CHANGE SUMMARY

Change 1 to ED-137-4C is summarized as follows:

Description of change	Affected chapters, paragraphs
Clarification related to unique PTT ON/OFF, SQU ON/OFF connref	Chapter 2.2.2 CALL RECORD DATA
Additional clarification provided	Chapter 3.2.1 EMBEDDED BINARY DATA
Update ssrc parameter interpretation	Chapter 3.2.4 FORMATING DETAILS FOR THE DIFFERENT TRANSPORT PARAMETERS
OPTIONS URL clarification	Chapter 3.4 RECORDING SERVER LIVELINESS
Format change, Rx/Tx Keywords added, bytes order specified	Chapter 3.5.3.8 R2S
Format change, Rx/Tx Keywords added, bytes format changed	Chapter 3.5.3.9 R2S-TLV
Timestamp format clarification	Chapter 3.5.5 TIMESTAMP FORMAT
Changed R2S base, clarification about sending of R2S-TLV, recording PTT lock-out mode note	Chapter 5.3.4 RECORD R2S HEADER EXTENSION
XSD schema fix	CHAPTER Annex A XML XSD SCHEMA
