Preface

IN May 1966 Committee 3 of the International Commission on Radiological Protection informed the Commission that the curriculum for school pupils of less than 18 years of age was beginning to include experiments and instructions involving sources of ionizing radiation. As protective recommendations for such applications had not been promulgated by the ICRP, Committee 3 recommended that a task group should be set up to prepare such recommendations. Two members of Committee 3—E. D. Trout and E. E. Smith—prepared this report for Committee 3, whose membership at the time the report was accepted was as follows:

B. LINDELL (*Chairman*)

E. E. SMITH (*Vice-Chairman*)

L.-E. LARSSON (*Secretary*)

F. P. COWAN

J. DUTREIX

S. TAKAHASHI

E. D. TROUT

H. O. WYCKOFF
