INTERNATIONAL ELECTROTECHNICAL COMMISSION

SPECIFICATION AND CHARACTERIZATION METHODS
FOR NONWOVEN “E” GLASS MAT

FOREWORD

A PAS is a technical specification not fulfilling the requirements for a standard, but made available to the public and established in an organization operating under given procedures.

IEC-PAS 62212 was submitted by the IPC (The Institute for Interconnecting and Packaging Electronic Circuits) and has been processed by IEC technical committee 52: Printed circuits. It will be further processed by IEC TC 91: Electronics assembly technology.

The text of this PAS is based on the following document:

This PAS was approved for publication by the P-members of the committee concerned as indicated in the following document:

Draft PAS	Report on voting
52/870/PAS	52/880/RVD

Following publication of this PAS, the technical committee or subcommittee concerned will investigate the possibility of transforming the PAS into an International Standard.

An IEC-PAS licence of copyright and assignment of copyright has been signed by the IEC and IPC and is recorded at the Central Office.

- 1) The IEC (International Electrotechnical Commission) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of the IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, the IEC publishes International Standards. Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. The IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of the IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested National Committees.
- 3) The documents produced have the form of recommendations for international use and are published in the form of standards, technical specifications, technical reports or guides and they are accepted by the National Committees in that sense.
- 4) In order to promote international unification, IEC National Committees undertake to apply IEC International Standards transparently to the maximum extent possible in their national and regional standards. Any divergence between the IEC Standard and the corresponding national or regional standard shall be clearly indicated in the latter.
- 5) The IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with one of its standards.
- 6) Attention is drawn to the possibility that some of the elements of this PAS may be the subject of patent rights. The IEC shall not be held responsible for identifying any or all such patent rights.

Acknowledgment

Any standard involving a complex technology draws material from a vast number of sources. While the principal members of the Nonwoven Glass Reinforcement Task Group (3-12f) are shown below, it is not possible to include all of those who assisted in the evolution of this standard. To each of them, the members of the IPC extend their gratitude.

Base Materials Committee	Nonwoven Glass Reinforcement Task Group	Technical Liaison of the IPC Board of Directors
Chairman D. Sober isola/USA	Chairman D. Lockyer Crane & Co.	J. Donaghy Sheldahl
Nonwoven Glass Reinforcement Task Group		
Bruce Andrews, Crane & Company Inc.	Terry Fischer, Hitachi Chemical Co. America	Joel Murray, Clark-Schwebel Inc.
Mike Bryant, BGF Industries Inc.	Jeffrey Gleim, P.H. Glatfelter Co.	Thomas Nowak, Nowak & Associates
H. Landis Carter, JPS Glass and Industrial Fabrics Corp.	Florian Gunkle, AlliedSignal Laminate Systems	Paul Reichenbacher, AlliedSignal Laminate Systems
Yong Deng, Owens-Corning Fiberglass Corp.	Ulrich Kempf, FiberMark Inc.	Tony Senese, Taconic
Nitin Desai, Motorola Inc.	Rodney Komlenic, Ahlstrom Paper Group	William Shaw, FiberMark Inc.
Howard Elliott, Polyclad Laminates Inc.	Robert Konsowitz, GIL Technologies	Lowell Sherman, Defense Supply Center Columbus DSCC
Werner Engelmaier, Engelmaier Associates Inc.	Dennis Lockyer, Crane & Company Inc.	Douglas Sober, isolaUSA
James Feeney, Morton Electronic Materials	P. Douglas Lyle, Owens-Corning Fiberglass Corp.	Xie Xiaoyan, Dongguan Shengyi Copper Clad Laminate Co. Ltd.
