IEEE Standards documents are developed within the Technical Committees of the IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Board. Members of the committees serve voluntarily and without compensation. They are not necessarily members of the Institute. The standards developed within IEEE represent a consensus of the broad expertise on the subject within the Institute as well as those activities outside of IEEE which have expressed an interest in participating in the development of the standard.

Use of an IEEE Standard is wholly voluntary. The existence of an IEEE Standard does not imply that there are no other ways to produce, test, measure, purchase, market, or provide other goods and services related to the scope of the IEEE Standard. Furthermore, the viewpoint expressed at the time a standard is approved and issued is subject to change brought about through developments in the state of the art and comments received from users of the standard. Every IEEE Standard is subjected to review at least every five years for revision or reaffirmation. When a document is more than five years old, and has not been reaffirmed, it is reasonable to conclude that its contents, although still of some value, do not wholly reflect the present state of the art. Users are cautioned to check to determine that they have the latest edition of any IEEE Standard.

Comments for revision of IEEE Standards are welcome from any interested party, regardless of membership affiliation with IEEE. Suggestions for changes in documents should be in the form of a proposed change of text, together with appropriate supporting comments.

Interpretations: Occasionally questions may arise regarding the meaning of portions of standards as they relate to specific applications. When the need for interpretations is brought to the attention of IEEE, the Institute will initiate action to prepare appropriate responses. Since IEEE Standards represent a consensus of all concerned interests, it is important to ensure that any interpretation has also received the concurrence of a balance of interests. For this reason IEEE and the members of its technical committees are not able to provide an instant response to interpretation requests except in those cases where the matter has previously received formal consideration.

Comments on standards and requests for interpretations should be addressed to:

Secretary, IEEE Standards Board
345 East 47th Street
New York, NY 10017
USA

IEEE Standards documents are adopted by the Institute of Electrical and Electronics Engineers without regard to whether their adoption may involve patents on articles, materials, or processes. Such adoption does not assume any liability to any patent owner, nor does it assume any obligation whatever to parties adopting the standards documents.

Foreword

(This Foreword is not a part of IEEE Std 1133-1988, IEEE Guide For Evaluating Nonceramic Materials For High-Voltage Outdoor Applications.)

This guide was prepared to assist users in evaluating nonceramic materials for high-voltage outdoor applications. Although various tests are outlined for the screening selection of materials, judgment and experience are essential in the overall selection process.

At the time of writing, the Outdoor Service Environment Committee had the following membership who contributed to the writing of this document:

E.A. Cherney, *Chairman*

J. E. Agee
A. Arakawa
J. Bramfitt

D. Dumora
R. W. Harmon

J. L. Nicholls
T. Orbeck
C. de Tourreil

The following persons were on the balloting committee that approved this document for submission to the IEEE Standards Board:

J. E. Agee
A. Arakawa
J. Bramfitt
R. E. Brideweser
E. A. Cherney

T. C. Cheng
C. de Tourreil
D. Dumora
R. W. Harmon

J. A. Kise
J. L. Nicholls
T. Orbeck
S. Studniarz
Z. Szilagyi

When the IEEE Standards Board approved this standard on June 9, 1988, it had the following membership:

Donald C. Fleckenstein, *Chairman*

Marco Migliaro, *Vice Chairman*

Andrew G. Salem, *Secretary*

Arthur A. Blaisdell
Fletcher J. Buckley
James M. Daly
Stephen R. Dillon
Eugene P. Fogarty
Jay Forster*
Thomas L. Hannan
Kenneth D. Hendrix
Theodore W. Hissey, Jr.

John W. Horch
Jack M. Kinn
Frank D. Kirschner
Frank C. Kitzantides
Joseph L. Koepfinger*
Irving Kolodny
Edward Lohse
John E. May, Jr.
Lawrence V. McCall

L. Bruce McClung
Don T. Michael*
Richard E. Mosher
L. John Rankine
Gary S. Robinson
Frank L. Rose
Helen M. Wood
Karl H. Zaininger
Donald W. Zipse

*Member Emeritus
