

IEEE Recommended Practice for Minimization of Interference from Radio-Frequency Heating Equipment

IEEE Std 140-1950

Published by The Institute of Electrical and Electronics Engineers, Inc 345 East 47th Street, New York, NY 10017, USA
SH00778

Recommended Practice
for
MINIMIZATION of INTERFERENCE from
RADIO-FREQUENCY HEATING EQUIPMENT

**THIS IS NOT AN AIEE STANDARD AND THE RECOMMENDATIONS
ARE NOT INTENDED TO BE MANDATORY OR RESTRICTIVE**

**Report of the Induction and Dielectric Heating Subcommittee
of the Committee on Electric Heating**

May 1950

Published by
INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS, INC.

IEEE Standards documents are developed within the Technical Committees of the IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Board. Members of the committees serve voluntarily and without compensation. They are not necessarily members of the Institute. The standards developed within IEEE represent a consensus of the broad expertise on the subject within the Institute as well as those activities outside of IEEE which have expressed an interest in participating in the development of the standard.

Use of an IEEE Standard is wholly voluntary. The existence of an IEEE Standard does not imply that there are no other ways to produce, test, measure, purchase, market, or provide other goods and services related to the scope of the IEEE Standard. Furthermore, the viewpoint expressed at the time a standard is approved and issued is subject to change brought about through developments in the state of the art and comments received from users of the standard. Every IEEE Standard is subjected to review at least once every five years for revision or reaffirmation. When a document is more than five years old, and has not been reaffirmed, it is reasonable to conclude that its contents, although still of some value, do not wholly reflect the present state of the art. Users are cautioned to check to determine that they have the latest edition of any IEEE Standard.

Comments for revision of IEEE Standards are welcome from any interested party, regardless of membership affiliation with IEEE. Suggestions for changes in documents should be in the form of a proposed change of text, together with appropriate supporting comments.

Interpretations: Occasionally questions may arise regarding the meaning of portions of standards as they relate to specific applications. When the need for interpretations is brought to the attention of IEEE, the Institute will initiate action to prepare appropriate responses. Since IEEE Standards represent a consensus of all concerned interests, it is important to ensure that any interpretation has also received the concurrence of a balance of interests. For this reason IEEE and the members of its technical committees are not able to provide an instant response to interpretation requests except in those cases where the matter has previously received formal consideration.

Comments on standards and requests for interpretations should be addressed to:

ACKNOWLEDGEMENT

The personnel of the Induction and Dielectric Heating Subcommittee of the AIEE Committee on Electric Heating, which prepared this publication, is as follows:

W. C. Rudd, *Chairman*

W. R. G. Baker	W. H. Meyer
M. Bock	L. R. Milburn
G. P. Bosomworth	C. W. Miller
E. W. Chapin	L. Milton
F. T. Chesnut	E. Mittleman
H. E. Dinger	G. W. Scott, Jr.
L. M. Duryee	J. T. Thwaites
J. E. Eiselein	R. L. Uphoff
C. W. Frick	G. E. Walters
W. H. Hickok	D. E. Watts
R. J. Hunn	O. Weitmann
T. R. Kennedy	H. R. Winemiller
T. P. Kinn	A. C. Wooldridge
G. W. Klingaman
