Draft American National Standard

Publication of this draft standard for comment and criticism has been approved by the Institute of Electrical and Electronics Engineers. Distribution of this draft standard for comment shall not continue beyond 12 months from the date of publication. It is expected that following this 12 month period, this draft standard, revised as necessary, shall be submitted to the American National Standards Institute for approval as an American National Standard. Suggestions for revision should be directed to the Secretary, IEEE Standards Committee, 345 East 47th Street, New York, N. Y. 10017.

NOTICE OF TRIAL-USE

Comments on this Trial-use Standard are welcomed and should be addressed to: Secretary, IEEE Standards Committee, 345 East 47th Street, New York, N.Y. 10017

After a trial-use period of approximately one year, the Group responsible for this document will prepare a revision and submit it to the Standards Committee for approval as a full-status standard.

Foreword

(This foreword is not a part of IEEE Std 430-1972, Trial-Use Procedures for the Measurement of Radio Noise from Overhead Power Lines (ANSI C63.11)).

Development of this standard was accomplished over a period of approximately ten years by the Radio Noise Subcommittee under sponsorship of the Transmission and Distribution Committee of the IEEE Power Engineering Society. The work was spearheaded by a working group under the direction of W. E. Pakala.

The Radio Noise Subcommittee has the following membership:

N. Kolcio, *Chairman*

P. D. Tuttle, *Secretary*
