

Proposed Test Procedure
for
EVALUATION of SYSTEMS of INSULATING MATERIALS
for ELECTRIC MACHINERY EMPLOYING
FORM-WOUND PRE-INSULATED COILS
(Machines rated at 50-2000 horsepower and below 6600 volts)

Published for trial use

AIEE No. 511

ACKNOWLEDGMENT

The Institute wishes to acknowledge its indebtedness to those who have so freely given their time and knowledge to the preparation of this test procedure. The work was carried out under the sponsorship of the Insulation Subcommittee of the Committee on Rotating Machinery.

The personnel of the Working Group was as follows:

G. L. Moses, *Chairman*

P. L. Alger	G. P. Gibson
C. E. Asbury	Lanier Greer
J. S. Askey	P. W. Hernick
B. M. Cain	J. L. Kuehlthau
A. W. W. Cameron	C. L. Sidway
J. F. Dexter	A. L. Van Emden
R. F. Franklin
