PERFORATED TAPE

(Published for trial use)

**Published by
AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
345 East 47th Street, New York 17, N. Y.**

FOREWORD

On June 21, 1960, the Communication Division Committee of AIEE authorized establishment of a Committee to develop standards for perforated tape. The Committee on Standardization of Perforated Tape was subsequently formed, with representatives from major manufacturers of printing telegraph apparatus, and commercial and government users of perforated tape in telegraph systems handling messages (including data). At the first meeting of the Committee, held on September 7, 1960, it was agreed that the jurisdiction of this Committee would be limited to communications, although other areas, such as data processing and machine tool control, might well find the communication standard applicable to their needs.

ACKNOWLEDGMENT

The Institute wishes to acknowledge its indebtedness to those who have so freely given of their time and knowledge and have conducted experimental work on which many of the publications are based.

This Standard was prepared by a special Committee of the AIEE Communication Division consisting of:

F. W. Smith, *Chairman*

J. L. Anast	D. E. Hempstead
J. W. Auwaerter	R. M. Hirsch
G. K. Burns	C. W. Hubley
H. F. Burkhard	W. A. Kennedy
H. F. Caley	A. Kingsley
D. K. Corcoran	R. H. Klich
R. A. Day	W. Y. Lang
C. E. Dean	R. F. Mundy
R. D. Elborune	V. J. Murphy
J. Falcone	D. C. Sherrick
A. E. Frost	F. C. White
