Foreword (This Foreword is not a part of American National Standard for Threaded Zinc-Coated Ferrous Strand-Eye Anchor Rods and Nuts for Overhead Line Construction, ANSI C135.2-1987.)

This standard covers requirements for threaded strand-eye anchor rods and nuts commonly used in overhead line construction. It was developed from a proposal submitted by a group of members of American National Standards Committee C135, which is in charge of this work.

Suggestions for improvement of this standard will be welcome. They should be sent to ASC C135 c/o NEMA, 2101 L Street, N.W., Washington, DC 20037.

This standard was processed and approved for submittal to ANSI by Accredited Standards Committee on Pole Line Hardware, C135. Committee approval of the standard does not necessarily imply that all committee members voted for its approval. At the time it approved this standard, the C135 Committee had the following members:

C. M. Giltner, Chairman
J. Gauthier Secretary
