

ANSI/IEEE C57.13.1-1981

(reaffirmed 1986)

(ANSI Reaffirmed 1987)

An American National Standard

IEEE Guide for Field Testing of Relaying Current Transformers

Sponsor

**Power System Relaying Committee
of the
IEEE Power Engineering Society**

Approved 9 March 1978
Reaffirmed 18 June 1986
Reaffirmed 19 March 1992

IEEE Standards Board

Secretariat

**Institute of Electrical and Electronics Engineers
National Electrical Manufacturers Association**

Approved 31 December 1980
Reaffirmed 25 August 1987
Reaffirmed 2 December 1992

American National Standard

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. An American National Standard is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard. American National Standards are subject to periodic review and users are cautioned to obtain the latest editions.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of publication. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

Foreword

(This Foreword is not a part of ANSI/IEEE C57.13.1-1981, IEEE Guide for Field Testing of Relaying Current Transformers.)

This guide was prepared by a Working Group of the Relay Input Sources Subcommittee of the IEEE Power System Relaying Committee of the IEEE Power Engineering Society.

The working group expresses its gratitude to past members, members of the Relay Input Sources Subcommittee, Power System Relaying Committee, Liaison Committees, and groups who have contributed their time and knowledge in preparing this guide.

At the time it approved this standard, C57 had the following membership:

I. H. Koponen, <i>Chair</i> C. R. Wilmore, <i>Secretary</i>	
<i>Organization Represented</i>	<i>Name of Representative</i>
Bonneville Power Administration	George W. Iliff
Electric Light and Power Group	R. R. Bast
	I. O. Berkhan
	I. H. Koponen
	J. P. Markey (Alt)
	B. F. Smith
	E. A. Villasuso
Institute of Electrical and Electronics Engineers	S. Bennon
	W. P. Burt
	J. C. Dutton
	D. C. Johnson
	L. W. Long
	D. E. Massey
National Electrical Manufacturers Association.....	L. C. Aicher
	W. R. Courtade
	J. D. Douglass
	W. C. Kendall
	C. W. Mayall (Alt)
	W. J. McNutt
	Norman M. Neagle (Alt)
	R. L. Schwab
	R. E. Uptegraff, Jr
	G. C. Wilburn
Rural Electrification Administration	J. C. Arnold, Jr
Tennessee Valley Authority	L. R. Smith
Underwriters Laboratories	W. A. Farquhar (Alt)
	E. J. Huber
U.S. Bureau of Reclamation	S. J. Baxter

The Relay Input Sources Subcommittee of the Power System Relaying Committee of the IEEE Power Engineering Society, at the time that it reviewed and approved this guide, had the following membership:

D. R. Volzka, *Chair*
J. W. Walton, *Secretary*

F. G. Basso
J. Berdy
J. L. Blackburn
C. F. Burke
M. B. DeJarnette
C. M. Gadsden

F. B. Hunt
W. C. Kotheimer
W. A. Lewis
M. D. Limerick
J. Miller
A. R. Summers

A. Sweetana
J. M. Vanderleck
L. N. Walker
E. C. Wentz

At the time this guide was approved the members of the working group of the Relay Input Sources Subcommittee were:

D. R. Volzka, *Chair*

C. F. Burke
D. H. Colwell

M. D. Limerick
R. E. Linton

F. E. Newman

When this guide was approved March 9, 1978, the IEEE Standards Board had the following membership:

Joseph L. Koepfinger, *Chair*
Irvin N. Howell, Jr, *Vice Chair*
Ivan G. Easton, *Secretary*

William E. Andrus
C. N. Berglund
Edward J. Cohen
Warren H. Cook
David B. Dobson
R. O. Duncan
Charles W. Flint

Jay Forster
Ralph I. Hauser
Loering M. Johnson
Irving Kolodny
William R. Kruesi
Thomas J. Martin
John E. May

Donald T. Michael
Voss A. Moore
William S. Morgan
Robert L. Pritchard
Blair A. Rowley
Ralph M. Showers
B. W. Whittington

CLAUSE	PAGE
1. Introduction	1
2. Consideration of American National Standards Institute (ANSI) Accuracy Classes	1
3. Safety Considerations in Field Testing Current Transformers	2
4. Current Transformer Types, Construction, Effect On Test Methods.....	2
4.1 Bushing, Window, or Bar-Type Current Transformers with Uniformly Distributed Windings.....	2
4.2 Wound Current Transformers, or Those without Uniformly Distributed Windings	2
4.3 Consideration of Remanence	3
5. Insulation Resistance Tests	4
6. Ratio Tests.....	4
6.1 Voltage Method.....	4
6.2 Current Method	5
7. Polarity Check.....	6
7.1 DC Voltage Test.....	6
7.2 AC Voltage Test — Oscilloscope	6
7.3 Current Method	7
8. Winding and Lead Resistance (Internal Resistance).....	8
9. Excitation Test	8
10. Burden Measurements.....	10
11. Specialized Situations	10
11.1 Current Transformers in a Closed-Delta Transformer Connection.....	10
11.2 Generator Current Transformers	10
11.3 Intercore Coupling Check	11
