American National Standard

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. An American National Standard is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standard. American National Standards are subject to periodic review and users are cautioned to obtain the latest editions.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken to reaffirm, revise, or withdraw this standard no later than five years from the date of publication. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

Foreword

(This Foreword is not a part of ANSI N42.6-1980, American National Standard Interrelationship of Quartz-Fiber Electrometer Type Exposure Meters and Companion Exposure Meter Chargers.)

The first version of this standard was approved as ANSI N3-1965 on September 20, 1965 after being letter balloted on June 2, 1964 by ANSI Technical Committee N 3 (Now N 42). It was reaffirmed in 1971, based on N 42 letter ballot of December 14, 1970, and was redesignated as N 42.6. The standard has been revised and the revision approved by N 42 letter ballot of May 16, 1977.

At the time it approved this standard, the American National Standards Committee N 42 on Radiation Instrumentation had the following personnel:

Louis Costrell, Chair
David C. Cook, Secretary

<i>Organization Represented</i>	<i>Name of Representative</i>
American Chemical Society	
American Conference of Governmental Industrial Hygienists	Jesse Lieberman
American Industrial Hygiene Association	
American Nuclear Society	Frank W. Manning
American Society of Mechanical Engineers	P. E. Greenwood
American Society of Safety Engineers	
Atomic Industrial Forum	
Health Physics Society	J. B. Horner Kuper Robert L. Butenhoff (<i>Alt</i>)
Institute of Electrical and Electronics Engineers	Louis Costrell D. C. Cook (<i>Alt</i>) P. J. Spurgin (<i>Alt</i>) J. Forster (<i>Alt</i>)
Instrument Society of America	M. T. Slind J. E. Kaveckis (<i>Alt</i>)
Lawrence Berkeley Laboratory	Lee J. Wagner
Manufacturing Chemists Association	
National Electrical Manufacturers Association	Theodore Hamburger
Oak Ridge National Laboratory	Frank W. Manning D. J. Knowles (<i>Alt</i>)
Scientific Apparatus Makers Association	
US Department of the Army, Materiel Command	Abraham E. Cohen
US Department of Commerce, National Bureau of Standards	Louis Costrell
US Civil Defense Preparedness Agency	Carl R. Siebentritt, Jr
US Department of Energy	
US Naval Research Laboratory	David C. Cook
