Approved Method for Photometric Testing of Indoor Fluorescent Luminaires

Publication of this report
has been approved by the IES.
Suggestions for revision
should be directed to the IES.

**Prepared by the Subcommittee on
Photometry of Indoor Luminaires
of the IES Testing Procedures Committee**

IES Standards and Guides are developed through committee consensus and produced by the IES Office in New York. Careful attention is given to style and accuracy. If any errors are noted in this document, please forward them to Rita Harrold, Director of Technology, at the above address for verification and correction. The IES welcomes and urges feedback and comments.

DISCLAIMER

IES publications are developed through the consensus standards development process approved by the American National Standards Institute. This process brings together volunteers representing varied viewpoints and interests to achieve consensus on lighting recommendations. While the IES administers the process and establishes policies and procedures to promote fairness in the development of consensus, it makes no guaranty or warranty as to the accuracy or completeness of any information published herein.

The IES disclaims liability for any injury to persons or property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, or reliance on this document.

In issuing and making this document available, the IES is not undertaking to render professional or other services for or on behalf of any person or entity. Nor is the IES undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

The IES has no power, nor does it undertake, to police or enforce compliance with the contents of this document. Nor does the IES list, certify, test or inspect products, designs, or installations for compliance with this document. Any certification or statement of compliance with the requirements of this document shall not be attributable to the IES and is solely the responsibility of the certifier or maker of the statement.

Approved Method for Photometric Testing of Indoor Fluorescent Luminaires

Contents

Foreword	1
Introduction	1
1.0 Scope	1
2.0 Normative References	1
3.0 Definitions	1
4.0 Ambient and Physical Conditions	1
4.1 General	1
4.2 Temperature	1
4.3 Air Movement	1
5.0 Electrical Conditions and Instrumentation	2
5.1 Wave Shape	2
5.2 Voltage Regulation	2
5.3 Power Source Impedance	2
5.4 Instrumentation for Electrical Measurements	2
5.4.1 Uncertainties	2
6.0 Test Requirements	2
6.1 Selection and Preparation of Luminaire	2
6.2 Luminaire Luminance Characteristics	2
6.3 Test Lamps	2
6.3.1 Special Considerations for Luminaires with Compact Fluorescent Lamps (CFLs)	3
6.3.2 Lamp/Circuit Transfer	3
6.3.3 Lamp Seasoning	3
6.4 Photometric Equipment	3
6.4.1 The Photometry System	3
6.4.2 Photometer	3
6.4.3 Automated Photometer	3
6.4.4 Photometer Head (Photodetector)	3
6.5 Luminaire Mounting	4
6.6 Lamp Circuit Connections	4
6.7 Stray Light	4
6.8 Luminaire / Lamp – Pre-burning - Stabilization	4
7.0 Photometric Test Procedures	4
7.1 Test Distance	4
7.2 Position Sensitivity	5

7.3 Calibration of Photometer - Relative and Absolute Photometry	5
7.3.1 Relative Photometry - Calibration Factor	5
7.3.2 Relative Photometry - The Calibration Process	6
7.3.3 Relative Photometry – Special considerations when testing lamps that produce maximum light output in an ambient temperature other than 25°C	7
7.3.4 Absolute Photometry	7
7.4 Ballast Factor	8
7.4.1 Ballast Factor Defined	8
7.4.2 Determination of Ballast Factor	8
7.4.3 Effect of Ballast Factors on Photometric Test Results	8
7.4.4 Application of Ballast Factors	8
7.5 Luminaire Photometry	8
7.5.1 Mounting	8
7.5.2 Position of Luminaire During Test	9
7.5.3 Angles for Measurement	9
7.5.4 Planes for Measurement	9
7.5.5 Polarization Measurements	9
7.6 Luminance Measurements	9
7.6.1 Angles of Measurements	9
7.7 Computation of Luminous Intensity Distribution Test Results	9
7.8 Computing Zonal Lumens	9
7.9 Overall Luminaire Efficiency	10
7.10 Coefficients of Utilization	10
8.0 Test Reports	10
Informative Reference List	11
Annex A - Zonal Lumen Constants	12
Annex B – Special Considerations for Stabilizing and Testing Various Fluorescent Lamp Types	13
