IESNA Approved Method for Photometric Testing of Indoor Luminaires Using High Intensity Discharge or Incandescent Filament Lamps

Publication of this Committee
Report has been approved
by the IESNA. Suggestions for
revisions should be directed
to the IESNA.

Prepared by:
The Subcommittee on Photometry of Indoor Luminaires
of the IESNA Testing Procedures Committee

DISCLAIMER

IESNA publications are developed through the consensus standards development process approved by the American National Standards Institute. This process brings together volunteers representing varied viewpoints and interests to achieve consensus on lighting recommendations. While the IESNA administers the process and establishes policies and procedures to promote fairness in the development of consensus, it makes no guaranty or warranty as to the accuracy or completeness of any information published herein. The IESNA disclaims liability for any injury to persons or property or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, or reliance on this document.

In issuing and making this document available, the IESNA is not undertaking to render professional or other services for or on behalf of any person or entity. Nor is the IESNA undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

The IESNA has no power, nor does it undertake, to police or enforce compliance with the contents of this document. Nor does the IESNA list, certify, test or inspect products, designs, or installations for compliance with this document. Any certification or statement of compliance with the requirements of this document shall not be attributable to the IESNA and is solely the responsibility of the certifier or maker of the statement.

Contents

Foreword	1
1.0 Objective	1
2.0 Selection of Lamps	1
3.0 Selection of Luminaires	1
4.0 Test Conditions	1
4.1 Extraneous Light	1
4.2 Ambient Temperature	1
4.3 Air Movement	1
4.4 Lamp Seasoning	2
4.5 Test Lamp Operation	2
4.6 Test Distance	2
4.7 Electrical Requirements	2
4.7.1 Power Source Voltage Regulation	2
4.7.2 Power Source Wave Shape	2
4.8 Instrumentation	2
4.9 Goniophotometer	2
4.9.1 General	2
4.9.2 Goniophotometer Systems	3
4.10 Photodetectors	3
5.0 Preparation of Equipment for Test	3
5.1 Luminaire Positioning on a Goniophotometer - General	3
5.1.1 Lamp Calibration	3
5.1.2 Luminaire Mounting	3
5.1.3 Lamp Orientation	3
6.0 Test Procedure	4
6.1 Photometric Calibration	4
6.1.1 Relative Method Photometry	5
6.1.2 Absolute Method Photometry	5
7.0 Photometric Measurement	6
7.1 Angles for Measurement	6
7.2 Planes for Measurement	6
8.0 Indirect Luminaires	6
9.0 Reporting Test Data	6
10.0 Use of Computers and the IESNA Standard Format	8
References	8
Annex A - Converting Candelas to Lumens Using Zonal Constants	10
Annex B - Sample Indoor Photometric Report	11
Annex C - Sample IESNA Formatted File	13
Annex D - Sample Luminaire Simulator	14
