

IPC-8911

2025 - May

Requirements for Conductive Yarns for E-Textiles Applications

An international standard developed by IPC

IPC Mission	IPC is a global trade association dedicated to furthering the competitive excellence and financial success of its members, who are participants in the electronics industry. In pursuit of these objectives, IPC will devote resources to management improvement and technology enhancement programs, the creation of relevant standards, protection of the environment, and pertinent government relations. IPC encourages the active participation of all its members in these activities and commits to full cooperation with all related organizations.
About IPC Standards	IPC standards and publications are designed to serve the public interest through eliminating misunderstandings between manufacturers and purchasers, facilitating interchangeability and improvement of products, and assisting the purchaser in selecting and obtaining with minimum delay the proper product for their particular need. Existence of such IPC standards and publications shall not in any respect preclude any entity from manufacturing or selling products not conforming to such IPC standards and publication, nor shall the existence of such IPC standards and publications preclude their voluntary use. IPC standards and publications are approved by IPC committees without regard to whether the IPC standards or publications may involve patents on articles, materials or processes. By such action, IPC does not assume any liability to any patent owner, nor does IPC assume any obligation whatsoever to parties adopting an IPC standard or publication. Users are wholly responsible for protecting themselves against all claims of liabilities for patent infringement.
IPC Position Statement on Specification Revision Change	The use and implementation of IPC standards and publications are voluntary and part of a relationship entered into by customer and supplier. When an IPC standard or publication is revised or amended, the use of the latest revision or amendment as part of an existing relationship is not automatic unless required by the contract. IPC recommends the use of the latest revision or amendment.
Standards Improvement Recommendations	IPC welcomes comments for improvements to any standard in its library. All comments will be provided to the appropriate committee. If a change to technical content is requested, data to support the request is recommended. Technical comments to include new technologies or make changes to published requirements should be accompanied by technical data to support the request. This information will be used by the committee to resolve the comment. To submit your comments, visit the IPC Status of Standardization page at www.ipc.org/status.

**IPC-8911**

Requirements for Conductive Yarns for E-Textiles Applications

Developed by the Conductive Yarns for E-Textiles Task Group (D-72a)
of the E-Textiles Committee (D-70) of IPC

IPC Standards and Artificial Intelligence (AI) Statement – 2025

IPC explicitly prohibits:

- The integration or transfer of any data whether in the form of IPC books, standards, metadata, or other formats—into AI engines or algorithms by any person or entity, including authorized distributors and their end users.
- Activities involving data harvesting, text and data mining, enrichment, or the creation of derivative works based on this data, including the use of automated data collection methods or artificial intelligence.

Any breach of these provisions is considered a copyright infringement unless expressly and formally authorized by IPC.

Users of this publication are encouraged to participate in the development of future revisions.

Acknowledgment

Any document involving a complex technology draws material from a vast number of sources across many continents. While the principal members of the Conductive Yarns for E-Textiles Task Group (D-72a) of the E-Textiles Committee (D-70) are shown below, it is not possible to include all of those who assisted in the evolution of this standard. To each of them, the members of the IPC extend their gratitude.

E-Textiles Committee	Conductive Yarns for E-Textiles Task Group	Technical Liaison of the IPC Board of Directors
Chair	Chair	Bob Neves
Vladan Koncar ENSAIT GEMTEX Lab – University of Lille	Joe Geiger Bally Ribbon Mills	Reliability Assessment Solutions Inc.
Vice-Chair	Vice-Chair	
Sigrid Rotzler IZM (Fraunhofer-Institut für Zuverlässigkeit und Mikrointegration)	Sahar Rostami Meta Platforms	

IPC recognizes the following A-Team for its exceptional leadership and effort in the development of this standard.

Hanging By a Thread A-Team

Joe Geiger Bally Ribbon Mills	Sigrid Rotzler IZM (Fraunhofer-Institut für Zuverlässigkeit und Mikrointegration)	Paula Veske Tallinn University of Applied Sciences
Sahar Rostami Meta Platforms	Haridoss Sarma GO 2 Scout 4 R&T	

Conductive Yarns for E-Textiles Task Group

Samuel Alexander Concept 2 Consumption	Caitlin Knowles Advanced Functional Fabrics of America (AFFOA)	Jim Owens Nautilus Defense
Zhiman Chen ZHUZHOU CRRC TIMES ELECTRIC CO., LTD	Abiodun Komolafe University of Southampton	Sahar Rostami Meta Platforms
Sirens Ciou Taiwan Textile Research Institute (TTRI)	Patricia Kowalski Myant, Inc.	Sigrid Rotzler IZM (Fraunhofer-Institut für Zuverlässigkeit und Mikrointegration)
James Din Celestica (Thailand) Limited	Eric Krinsky Syscom Advanced Materials Inc.	Md Abdullahn al Rumon University of Rhode Island
Chris Doughty Meta - Reality Labs	David Lee Avient Corporation	Haridoss Sarma GO 2 Scout 4 R&T
Roger Franz TE Connectivity	Birgit Leitner Propel LLC	Laura Shumaker Oplossing Design, LLC
Jana Friede Statex Produktions- und Vertriebs GmbH	Jun Liu RENEW Institute	Yun-Chen Sung Taiwan Textile Research Institute (TTRI)
Joe Geiger Bally Ribbon Mills	Sam Matthews Bekaert Corporation	Leslie Thomas Factory 404 LLC
Tiffany Greyson PE, Redhill Embedded	Leah Mhanga Linköpings University	Brian Tolen Meta
Melanie Hoerr 3E Smart Solutions, a subsidiary of ZSK	Kristen Mulherin Advanced Functional Fabrics of America (AFFOA)	Xing Tong SAIC
