## Preface

This preface, as well as all footnotes and annexes, is included for information purposes and is not part of ANSI/ISA-61241-11 (12.10.04)-2006.

This document has been prepared as part of the service of ISA toward a goal of uniformity in the field of instrumentation. To be of real value, this document should not be static but should be subject to periodic review. Toward this end, the Society welcomes all comments and criticisms and asks that they be addressed to the Secretary, Standards and Practices Board; ISA; 67 Alexander Drive; P. O. Box 12277; Research Triangle Park, NC 27709; Telephone (919) 549-8411; Fax (919) 549-8288; E-mail: standards@isa.org.

The ISA Standards and Practices Department is aware of the growing need for attention to the metric system of units in general, and the International System of Units (SI) in particular, in the preparation of instrumentation standards. The Department is further aware of the benefits to USA users of ISA standards of incorporating suitable references to the SI (and the metric system) in their business and professional dealings with other countries. Toward this end, this Department will endeavor to introduce SI-acceptable metric units in all new and revised standards, recommended practices, and technical reports to the greatest extent possible. *Standard for Use of the International System of Units (SI): The Modern Metric System*, published by the American Society for Testing & Materials as IEEE/ASTM SI 10-97, and future revisions, will be the reference guide for definitions, symbols, abbreviations, and conversion factors.

It is the policy of ISA to encourage and welcome the participation of all concerned individuals and interests in the development of ISA standards, recommended practices, and technical reports. Participation in the ISA standards-making process by an individual in no way constitutes endorsement by the employer of that individual, of ISA, or of any of the standards, recommended practices, and technical reports that ISA develops.

**CAUTION — ISA ADHERES TO THE POLICY OF THE AMERICAN NATIONAL STANDARDS INSTITUTE WITH REGARD TO PATENTS. IF ISA IS INFORMED OF AN EXISTING PATENT THAT IS REQUIRED FOR USE OF THE DOCUMENT, IT WILL REQUIRE THE OWNER OF THE PATENT TO EITHER GRANT A ROYALTY-FREE LICENSE FOR USE OF THE PATENT BY USERS COMPLYING WITH THE DOCUMENT OR A LICENSE ON REASONABLE TERMS AND CONDITIONS THAT ARE FREE FROM UNFAIR DISCRIMINATION.**

**EVEN IF ISA IS UNAWARE OF ANY PATENT COVERING THIS DOCUMENT, THE USER IS CAUTIONED THAT IMPLEMENTATION OF THE DOCUMENT MAY REQUIRE USE OF TECHNIQUES, PROCESSES, OR MATERIALS COVERED BY PATENT RIGHTS. ISA TAKES NO POSITION ON THE EXISTENCE OR VALIDITY OF ANY PATENT RIGHTS THAT MAY BE INVOLVED IN IMPLEMENTING THE DOCUMENT. ISA IS NOT RESPONSIBLE FOR IDENTIFYING ALL PATENTS THAT MAY REQUIRE A LICENSE BEFORE IMPLEMENTATION OF THE DOCUMENT OR FOR INVESTIGATING THE VALIDITY OR SCOPE OF ANY PATENTS BROUGHT TO ITS ATTENTION. THE USER SHOULD CAREFULLY INVESTIGATE RELEVANT PATENTS BEFORE USING THE DOCUMENT FOR THE USER'S INTENDED APPLICATION. HOWEVER, ISA ASKS THAT ANYONE REVIEWING THIS DOCUMENT WHO IS AWARE OF ANY PATENTS THAT MAY IMPACT IMPLEMENTATION OF THE DOCUMENT NOTIFY THE ISA STANDARDS AND PRACTICES DEPARTMENT OF THE PATENT AND ITS OWNER. ADDITIONALLY, THE USE OF THIS DOCUMENT MAY INVOLVE HAZARDOUS MATERIALS, OPERATIONS OR EQUIPMENT. THE DOCUMENT CANNOT ANTICIPATE ALL POSSIBLE APPLICATIONS OR ADDRESS ALL POSSIBLE SAFETY ISSUES ASSOCIATED WITH USE IN HAZARDOUS CONDITIONS. THE USER OF THIS DOCUMENT MUST EXERCISE SOUND PROFESSIONAL JUDGMENT CONCERNING ITS USE AND APPLICABILITY UNDER THE USER'S PARTICULAR CIRCUMSTANCES. THE USER MUST ALSO CONSIDER THE APPLICABILITY OF ANY GOVERNMENTAL REGULATORY LIMITATIONS AND**

**ESTABLISHED SAFETY AND HEALTH PRACTICES BEFORE IMPLEMENTING THIS DOCUMENT.**

**THE USER OF THIS DOCUMENT SHOULD BE AWARE THAT THIS DOCUMENT MAY BE IMPACTED BY ELECTRONIC SECURITY ISSUES. THE COMMITTEE HAS NOT YET ADDRESSED THE POTENTIAL ISSUES IN THIS VERSION.**

| 10    | Type verifications, assessments and type tests .....                                                               | 17 |
| 10.1  | Spark ignition assessment .....                                                                                    | 17 |
| 10.2  | Temperature tests .....                                                                                            | 18 |
| 10.3  | Voltage tests .....                                                                                                | 18 |
| 10.4  | <del>Small component ignition test</del> .....                                                                     | 18 |
| 10.5  | Determination of parameters of loosely specified components .....                                                  | 18 |

|                                                                                                                                                                           |        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| 10.6 Tests for cells and batteries.....                                                                                                                                   | 18     |
| 10.7 Mechanical test.....                                                                                                                                                 | 18     |
| 10.7.1 Casting compound.....                                                                                                                                              | 18     |
| 10.7.2 Partitions.....                                                                                                                                                    | 18     |
| 10.8 Tests for apparatus containing piezoelectric devices.....                                                                                                            | 18     |
| 10.9 Type tests for diode safety barriers and safety shunts.....                                                                                                          | 19     |
| 10.10 Cable pull test.....                                                                                                                                                | 19     |
| 11 Routine verifications and tests.....                                                                                                                                   | 19     |
| 12 Marking.....                                                                                                                                                           | 19     |
| 12.1 General.....                                                                                                                                                         | 19     |
| 12.2 Marking of connection facilities.....                                                                                                                                | 19     |
| 12.3 <u>Control drawings</u> .....                                                                                                                                        | 20     |
| 13 Documentation.....                                                                                                                                                     | 20     |
| Annex A (normative) <u>Spark test apparatus for intrinsically safe circuits</u> .....                                                                                     | 23     |
| Annex B (informative) <u>Measurement of creepage distances, clearances and separation</u><br><u>distances through casting compound and through solid insulation</u> ..... | 23     |
| Annex C (normative) <u>Encapsulation</u> .....                                                                                                                            | 23     |
| Annex D (informative) <u>US national deviations</u> .....                                                                                                                 | 25     |
| <br>Table A — <u>Exclusion of specific clauses of ANSI/ISA-61241-0 (12.10.02)-2006</u> .....                                                                              | <br>11 |
| Table 1 — <u>Permitted dissipation within a component</u> .....                                                                                                           | 15     |

## FOREWORD

All text of IEC 61241-11:2005 including Corrigendum 1 is included in this document. U.S. National Deviations are shown by ~~strikeout~~ through deleted text and underline under added text. There are four annexes in this standard. Annex D is informative and is not considered part of this standard. Annexes A, B and C are normative and are considered part of this standard.
