Preface

This Preface is included for informational purposes and is not a part of ANSI/ISA-50.1-1982 (R1992).

This Standard has been prepared as a part of the service of ISA toward a goal of uniformity in the field of instrumentation. To be of real value, this document should not be static, but should be subject to periodic review. Toward this end, the Society welcomes all comments and criticisms, and asks that they be addressed to the Secretary, Standards and Practices Board, ISA, 67 Alexander Drive, P.O. Box 12277, Research Triangle Park, NC 27709, Telephone (919) 549-8411, e-mail: standards@isa.org.

The ISA Standards and Practices Department is aware of the growing need for attention to the metric system of units in general, and the International System of Units (SI) in particular, in the preparation of instrumentation standards. The Department is further aware of the benefits to USA users of ISA Standards of incorporating suitable references to the SI (and the metric system) in their business and professional dealings with other countries. Towards this end, this Department will endeavor to introduce SI-acceptable metric units in all new and revised standards to the greatest extent possible. *The Metric Practice Guide*, which has been published by the American Society for Testing and Materials as ANSI designation Z210.1 (ASTM E380-76, IEEE Std. 268-1975), and future revisions, will be the reference guide for definitions, symbols, abbreviations, and conversion factors.

It is the policy of ISA to encourage and welcome the participation of all concerned individuals and interests in the development of ISA Standards. Participation in the ISA standards making process by an individual in no way constitutes endorsement by the employer of that individual of ISA or any of the standards which ISA develops.

The following individuals served as members of the 1975 SP50 committee:

NAME	COMPANY
V. V. Tivy, Chairman	Bailey Meter Co.
M. Bergston	Barber-Coleman Co.
D. M. Boyd	Universal Oil Products Co.
C. M. Buehler	Taylor Instrument Div., Sybron Corp.
R. Dallimonti	Honeywell Inc.
E. T. Davis	Consultant
R. Deuschle	Fisher Controls Corp.
M. Bradner	The Foxboro Co.
R. Horne	Beckman Instruments, Inc.
E. S. Ida	E.I du Pont de Nemours & Co., Inc.
H. H.Koppel	Bailey Meter Co.
D. D. MacKenzie	Acco-Bristol
T. H. Sonnichsen	Esso Research and Engineering Co.
R. Rose	Rosemount Engineering Co.
W. C. Trethewey	Anchor Hocking Co.
J. J. Walthall	Union Carbide Corp.
J. A. Parker	Tex-A-Mation Engineering, Inc.
A. E. Turner	Westinghouse Electric Corp.
D. F. Ryan	Leeds & Northrup Co.

The following individuals served as members of the 1982 SP50 committee:

NAME	COMPANY
V. Tivy, Chairman	Allied Technologies
R. Amaya	Fluor Engineers
L. Asbjornsen	Bristol Babcock
M. Bradner	The Foxboro Company
E. S. Ida	Retired
F. Lynch	Honeywell
J. A. Parker	Tex-A-Mation
D. Smith	
W. Tretheway	Anchor Hocking
P. Wing	Retired

This Standard was approved for publication by the ISA Standards and Practices Board in January 1982.

NAME	COMPANY
T. J. Harrison, Chairman	IBM Corporation
P. Bliss	Consultant
W. Calder	The Foxboro Company
N. Conger	Continental Oil Co.
B. Feikle	Bailey Controls Co.
R. T. Jones	Philadelphia Electric Co.
R. Keller	Boeing Company
O. P. Lovett, Jr.	Isis Corp.
E. C. Magison	Honeywell, Inc.
A. P. McCauley	Diamond Shamrock Corp.
J. W. Mock	Consultant
E. M. Nesvig	ERDCO Engineering Corp.
G. Platt	Bechtel Power Corp.
R. Prescott	Moore Products Company
W. C. Weidman	Gilbert Associates
K. A. Whitman	Allied Chemical Corp.
J. R. Williams	Stearns-Roger, Inc.
B. A. Christensen*	
L. N. Combs*	
R. L. Galley*	
R. G. Marvin*	
W. B. Miller*	Moore Products Company
R. L. Nickens*	

*Director Emeritus

Contents

1 Scope and purpose	7
2 Definitions	7
2.1 Elements of process control systems	7
2.2 Subsystems	7
2.3 Analog dc current signal	7
2.4 Measured value of an analog dc current signal	7
2.5 Range of an analog dc current signal	7
2.6 Lower limit	7
2.7 Upper limit	7
2.8 Load resistance	8
2.9 Ripple content	8
2.10 Signal common	8
2.11 Signal isolation	8
3 Standard signals	8
3.1 Polarity	8
3.2 Transmitters	8
3.3 Receivers	8
4 Standard transmitters	8
4.1 General	8
4.2 System compatibility	9
4.3 Classification	9
4.4 Load resistance specification	10
4.5 Electrical isolation	10
4.6 Ripple and noise content	13
5 Standard receivers	13
5.1 Inputs	13
5.2 Outputs	13
5.3 Isolation	14
6 System	14
6.1 Signal common	14
6.2 Power supplies	14
6.3 Transmitters	14
6.4 Receivers or signal processors	14
6.5 Test power sources	15
7 Appendix	15
