Research Triangle Park, North Carolina 27709

Preface

This preface and the appendix referring to other standards and codes are included for informational purposes only and are not part of ISA-S67.10. Applicability of referenced standards and codes is as stated in the text of this standard. Where reference is made to a standard or code, a particular paragraph is indicated for clarity, as applicable.

This standard has been prepared as part of the service of the Instrument Society of America (ISA) toward a goal of uniformity in the field of instrumentation. To be of real value, this document should not be static, but should be subject to periodic review. Toward this end, the Society welcomes all comments and criticisms, and asks that they be addressed to the Secretary, Standards and Practices Board, Instrument Society of America, 67 Alexander Drive, P.O. Box 12277, Research Triangle Park, NC 27709, Telephone (919) 549-8411.

The ISA Standards and Practices Department is aware of the growing need for attention to the metric system of units in general, and the International System of Units (SI) in particular, in the preparation of instrumentation standards, recommended practices, and technical reports. The Department is further aware of the benefits to USA users of ISA standards of incorporating suitable references to the SI (and the metric system) in their business and professional dealings with other countries. Toward this end, this Department will endeavor to introduce SI-acceptable metric units as optional alternatives to English units in all new and revised standards to the greatest extent possible. The Metric Practice Guide, which has been published by the Institute of Electrical and Electronics Engineers as ANSI/IEEE Std. 268-1992, and future revisions will be the reference guide for definitions, symbols, abbreviations, and conversion factors. SI (metric) conversions in this standard are given only to the precision intended in selecting the original numerical value. When working in the SI units, the given SI value should be used; when working in customary U.S. units, the given U.S. value should be used.

It is the policy of the Instrument Society of America to encourage and welcome the participation of all concerned individuals and interests in the development of ISA standards, recommended practices, and technical reports. Participation in the ISA standards-making process by an individual in no way constitutes endorsement by the employer of that individual, of the Instrument Society of America, or of any of the standards that ISA develops.

The information contained in the preface, footnotes, and appendices is included for information only and is not a part of the standard.

ISA Committee SP67.10 was formed in October 1978, after approval of its purpose and scope by the ISA Standards and Practices Board. Approval of the project charter was granted by the American National Standards Institute (ANSI) on March 18, 1981.

The intent of this standard is to provide criteria for the design and installation of lines through which liquid or gaseous samples flow. This standard has been developed to complement ISA – S67.01 and S67.02, which address instrument installation and sensing lines, respectively. S67.10 is now the responsibility of the S67.02 subcommittee. Only editorial changes were made in this revision. The next revision of this standard will be incorporated into S67.02.

The following people served as members of ISA Subcommittee SP67.02 which revised this standard:

NAME

*R. Neustadter, Chairman
J. Rosen, Jr., Vice Chairman
R. Webb, Managing Director
J. Britt

COMPANY

Raytheon Engineers & Constructors, Inc.
Ansaldo Industria of America
Pacific Gas & Electric Company
Seabrook Station

*C. Chalmers	Parker-Hannifin Corporation
A. Cockerill	Carolina Power & Light Company
F. Cunningham	Swagelok Company
W. Fadden	Yankee Atomic Electric Company
M. Fortini	Stone & Webster, Inc.
V. Fregonese	Public Service Electric & Gas
L. Fron	Consultant
D. Gartner	Cleveland Electric & Illuminating Company
B. Gordon	Bechtel Savannah River, Inc.
*G. Gupta	Raytheon Engineers & Constructors, Inc.
R. Hindia	Sargent & Lundy
R. Jones	Stone & Webster, Inc.
S. Kincaid	Consultant
J. Lipka	Consultant
G. Livesey	Ebasco Services, Inc.
J. Mauck	US Nuclear Regulatory Commission
B. McMillen	Nebraska Public Power District
J. Nay	Westinghouse Electric Corporation
C. Noakes	Oak Ridge National Lab
R. Patel	North Atlantic Energy Service Corporation
T. Slavic	Duquesne Light Company
J. Stevens	Gibbs & Hill, Inc.
B. Sun	Electric Power Research Institute
W. Weston	Rohm & Haas Company
F. Zikas	Parker-Hannifin Corporation

*One vote per company

The following people served as members of ISA Committee SP67:

NAME	COMPANY
R. Wiegler, Chairman	Philadelphia Electric Company
*R. Naylor, Vice Chairman	Commonwealth Edison
*R. Webb, Managing Director	Pacific Gas & Electric Company
R. Allen	ABB Combustion Engineering, Inc.
M. Annon	I&C Engineering Associates
J. Arpin	Combustion Engineering, Inc.
*B. Basu	Southern California Edison Company
J. Bauer	General Atomics Company
M. Belew	Tennessee Valley Authority
*M. Berkovich	Bechtel Power Corporation
B. Beuchel	NAESCO
P. Branch	Consultant
R. Brown	ABB Impell Corporation
*G. Cooper	Commonwealth Edison
N. Dogra	Impell Corporation
R. Dulski	Covax Buffalo Corporation
*A. Ellis	Westinghouse Electric Corporation
