## Preface

---

This preface, as well as all footnotes and annexes, is included for informational purposes and is not part of ISA-TR77.81.05.

This technical report has been prepared as part of the service of ISA, the international society for measurement and control, toward a goal of uniformity in the field of instrumentation. To be of real value, this document should not be static but should be subject to periodic review. Toward this end, the Society welcomes all comments and criticisms and asks that they be addressed to the Secretary, Standards and Practices Board; ISA; 67 Alexander Drive; P. O. Box 12277; Research Triangle Park, NC 27709; Telephone (919) 990-9227; Fax (919) 549-8288; e-mail: standards@isa.org.

The ISA Standards and Practices Department is aware of the growing need for attention to the metric system of units in general, and the International System of Units (SI) in particular, in the preparation of instrumentation standards, recommended practices, and technical reports. The Department is further aware of the benefits to USA users of ISA standards of incorporating suitable references to the SI (and the metric system) in their business and professional dealings with other countries. Toward this end, this Department will endeavor to introduce SI-acceptable metric units in all new and revised standards to the greatest extent possible. *The Metric Practice Guide*, which has been published by the Institute of Electrical and Electronics Engineers as ANSI/IEEE Std. 268-1992, and future revisions, will be the reference guide for definitions, symbols, abbreviations, and conversion factors.

It is the policy of ISA to encourage and welcome the participation of all concerned individuals and interests in the development of ISA standards, recommended practices, and technical reports. Participation in the ISA standards-making process by an individual in no way constitutes endorsement by the employer of that individual, of ISA, or of any of the standards, recommended practices, and technical reports that ISA develops.

**NOTE:** Where *Annexes* are mentioned within this document, they refer to Annexes A, B, or C of ISA-TR77.81.05. Where *Appendices* are mentioned within this document, they refer to Appendices A, B, D, or E of 40 CFR 75.

The following people served as members of ISA Subcommittee SP77.81:

| NAME                          | COMPANY                             |
|-------------------------------|-------------------------------------|
| *J. Weiss, Chairman           | Electric Power Research Institute   |
| H. Hopkins, Managing Director | Utility Products of Arizona         |
| B. Anderson                   | Ashland Petroleum Company           |
| J. Batug                      | Pennsylvania Power & Light Company  |
| G. Bennett                    | Kansas City Power & Light Company   |
| *B. Bonner                    | Electric Power Research Institute   |
| D. Cholish                    | PSE&G Research & Testing Laboratory |
| D. Crow                       | TU Electric                         |
| *C. Dene                      | Electric Power Research Institute   |

## Foreword

---

Continuous Emission Monitoring Systems (CEMS) Relative Accuracy Test Audit (RATA) Data is needed for reporting to the Environmental Protection Agency (EPA) to comply with 40 CFR 75 regulations. This technical report provides guidance for facilitating the exchange of RATA data to comply with 40 CFR 75 requirements.

---

## Abstract

---

This technical report provides guidance for facilitating the exchange of RATA data to comply with 40 CFR 75 requirements.

---

## Key Words

---

Continuous Emission Monitoring Systems (CEMS), Relative Accuracy Test Audit (RATA), Data Acquisition and Handling Systems (DAHS), Source tester, Certification.
