Cinematography — Spools, daylight loading type for 16 mm motion-picture cameras — Dimensions

Cinématographie — Bobines pour chargement en plein jour pour caméras 16 mm — Dimensions

Second edition — 1982-10-01

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 1019 was developed by Technical Committee ISO/TC 36, *Cinematography*.

This second edition was submitted directly to the ISO Council, in accordance with clause 5.10.1 of part 1 of the Directives for the technical work of ISO. It cancels and replaces the first edition (i.e. ISO 1019-1975), which had been approved by the member bodies of the following countries :

Belgium	Germany, F. R.	Romania
Brazil	Greece	South Africa, Rep. of
Bulgaria	Hungary	Sweden
Canada	Israel	Switzerland
Chile	Italy	United Kingdom
Czechoslovakia	Japan	USA
Egypt, Arab Rep. of	Korea, Rep. of	
France	Netherlands	

No member body had expressed disapproval of the document.
