Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 105/J was developed by Technical Committee ISO/TC 38, *Textiles*, and was circulated to the member bodies in July 1979.

NOTE — International Standard ISO 105 is presented in the form of parts. Each of these parts corresponds to a group and is split up into its different component sections. This form facilitates the replacement of existing sections by successive editions as necessary.

This edition of part J is composed of section J01-1982.

Contents of ISO 105

- ISO 105/A Textiles — Tests for colour fastness —**
Part A : General principles
A01 General principles of testing
A02 Grey scale for assessing change in colour
A03 Grey scale for assessing staining
- ISO 105/B Textiles — Tests for colour fastness —**
Part B : Colour fastness to light and weathering
B01 Colour fastness to light : Daylight
B02 Colour fastness to light : Xenon arc
B03 Colour fastness to weathering : Outdoor exposure
B04 Colour fastness to weathering : Xenon arc
B05 Detection and assessment of photochromism
- ISO 105/C Textiles — Tests for colour fastness —**
Part C : Colour fastness to washing and laundering
C01 Colour fastness to washing : Test 1
C02 Colour fastness to washing : Test 2
C03 Colour fastness to washing : Test 3
C04 Colour fastness to washing : Test 4
C05 Colour fastness to washing : Test 5
C06 Colour fastness to domestic and commercial laundering
- ISO 105/D Textiles — Tests for colour fastness —**
Part D : Colour fastness to dry cleaning
D01 Colour fastness to dry cleaning
D02 Colour fastness to rubbing : Organic solvents
- ISO 105/E Textiles — Tests for colour fastness —**
Part E : Colour fastness to aqueous agencies
E01 Colour fastness to water
E02 Colour fastness to sea water
E03 Colour fastness to chlorinated water (swimming-bath water)
E04 Colour fastness to perspiration
E05 Colour fastness to spotting : Acid
E06 Colour fastness to spotting : Alkali
E07 Colour fastness to spotting : Water
E08 Colour fastness to water : Hot water
E09 Colour fastness to potting
E10 Colour fastness to decatizing
E11 Colour fastness to steaming
E12 Colour fastness to milling : Alkaline milling
E13 Colour fastness to acid-felting : Severe
E14 Colour fastness to acid-felting : Mild
- ISO 105/F Textiles — Tests for colour fastness —**
Part F : Standard adjacent fabrics
F01 Specification for standard adjacent fabric : Wool
F02 Specification for standard adjacent fabric : Cotton and viscose
F03 Specification for standard adjacent fabric : Polyamide
F04 Specification for standard adjacent fabric : Polyester
F05 Specification for standard adjacent fabric : Acrylic
F06 Specification for standard adjacent fabric : Silk
- ISO 105/G Textiles — Tests for colour fastness —**
Part G : Colour fastness to atmospheric contaminants
G01 Colour fastness to nitrogen oxides
G02 Colour fastness to burnt gas fumes
G03 Colour fastness to ozone in the atmosphere
