JUN 6 - 1974

UDC 661.185-404.9 : 531.74

Ref. No. ISO 1064-1974 (E)

Descriptors : surfactants, pastes, density measurement, bulk density.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 91 has reviewed ISO Recommendation R 1064 and found it suitable for transformation. International Standard ISO 1064 therefore replaces ISO Recommendation R 1064-1969.

ISO Recommendation R 1064 was approved by the Member Bodies of the following countries :

Austria	Hungary	Portugal
Belgium	India	Romania
Canada	Iran	South Africa, Rep. of
Chile	Israel	Spain
Czechoslovakia	Japan	Sweden
Egypt, Arab Rep. of	Korea, Rep. of	Switzerland
France	Netherlands	Turkey
Germany	New Zealand	United Kingdom
Greece	Poland	Yugoslavia

No Member Body expressed disapproval of the Recommendation.

No Member Body disapproved the transformation of ISO/R 1064 into an International Standard.
