Analysis of soaps — Determination of glycerol content — Titrimetric method

Analyse des savons — Dosage du glycérol — Méthode titrimétrique

First edition — 1975-05-01

UDC 661.185 : 543.062 : 547.426

Ref. No. ISO 1066-1975 (E)

Descriptors : surfactants, soaps, chemical analysis, determination of content, glycerol, volumetric analysis.

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 91 has reviewed ISO Recommendation R 1066 and found it technically suitable for transformation. International Standard ISO 1066 therefore replaces ISO Recommendation R 1066-1969 to which it is technically identical.

ISO Recommendation R 1066 was approved by the Member Bodies of the following countries :

Austria	Iran	Romania
Belgium	Ireland	South Africa, Rep. of
Canada	Israel	Spain
Chile	Italy	Sweden
Czechoslovakia	Japan	Switzerland
Egypt, Arab Rep. of	Korea, Rep. of	Turkey
France	Netherlands	United Kingdom
Germany	New Zealand	Yugoslavia
Hungary	Poland	
India	Portugal	

No Member Body expressed disapproval of the Recommendation.

No Member Body disapproved the transformation of ISO/R 1066 into an International Standard.
