Plywood — Measurement of dimensions of panels

Contreplaqué — Mesurage des dimensions des panneaux

First edition — 1975-08-01

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 139 has reviewed ISO Recommendation R 1097 and found it technically suitable for transformation. International Standard ISO 1097 therefore replaces ISO Recommendation R 1097-1969 to which it is technically identical.

ISO Recommendation R 1097 was approved by the Member Bodies of the following countries:

Australia	India	Romania
Austria	Iran	South Africa, Rep. of
Canada	Italy	Spain
Colombia	Israel	Sweden
Czechoslovakia	Netherlands	Switzerland
Egypt, Arab Rep. of	New Zealand	Thailand
Finland	Norway	Turkey
France	Peru	United Kingdom
Germany	Poland	
Hungary	Portugal	

No Member Body expressed disapproval of the Recommendation.

The Member Bodies of the following countries disapproved the transformation of ISO/R 1097 into an International Standard :

Norway
Sweden
